

Product Specification

Explorer Gas Lift Lab Height Chair

Seat Shell

The Explorer Shaped Seat Shell is a one-piece shaped seat shell designed with a smooth back patented flat ribbing support system, specifically through the center back of the seat referred to as the "Power Rib". The "Power Rib" is essential to achieving a smooth and flexible back design. Stability Ribbing along the sides have been added for extra support and strength. The seat is attached to the frame by means of six steel rivets attached to a fully welded engineered mounting bracket.

Frame

Frame is a five star black nylon base. Gas cylinder number 210 adjustment 21.5"-29". Heavy duty seat plate with direct contact adjustment level. Standard chrome foot ring.
