

Product Specification

Explorer Rocker Chair

Seat Shell

The Explorer Shaped Seat Shell is a one-piece shaped seat shell designed with a smooth back patented flat ribbing support system, specifically through the center back of the seat referred to as the "Power Rib". The "Power Rib" is essential to achieving a smooth and flexible back design. Stability Ribbing along the sides have been added for extra support and strength. The seat is attached to the frame by means of six steel rivets attached to a fully welded engineered mounting bracket.

Frame

Leg tube is continuous and is a 12-gauge heavily reinforced tubular steel. Legs are 1" round in diameter. Double Strut supported frame. Mounting brackets are 16-gauge. Leg tubes and mounting brackets are all to be circumferential welded to form a structurally solid, freestanding frame. The base leg arc is perfectly balanced to provide a gentle rocking motion.

Size(s)

Junior Shell: 12" Seat Height
Junior Shell: 14" Seat Height
Senior Shell: 16" Seat Height
Senior Shell: 18" Seat Height
