

Product Specification

Integrity Cantilever Chair

Seat Shell

The Integrity Ribbed Back Seat Shell is a one-piece soft polypropylene shell designed with an ergonomic hourglass shape, allowing for proper lumbar and high back-shoulder support. 13-reinforcement ribs are required to eliminate the need for any additional back support tubes or seat support brackets. The seat is attached to the frame by means of six steel rivets attached to a fully welded engineered mounting bracket. Seat shells must have a handle grip hole. Other custom colors available based on minimum volumes.

Frame

Leg tubes are heavily reinforced 12-gauge tubular steel for extra reinforcement. Legs are 1" round in diameter. Mounting brackets are 16-gauge. Leg tubes and mounting brackets are all to be circumferential welded to form a structurally solid, freestanding frame.

Size(s)

Junior Shell: 12" Seat Height
Junior Shell: 14" Seat Height
Senior Shell: 16" Seat Height
Senior Shell: 18" Seat Height
