Integrity Caster Chair

Seat Shell

The Integrity Ribbed Back Seat Shell is a one-piece soft polypropylene shell designed with an ergonomic hourglass shape, allowing for proper lumbar and high back-shoulder support. 13-reinforcement ribs are required to eliminate the need for any additional back support tubes or seat support brackets. The seat is attached to the frame by means of six steel rivets attached to a fully welded engineered mounting bracket. Seat shells must have a handle grip hole. Other custom colors available based on minimum volumes.

Frame

All leg tubes are 1" 16-gauge tubular steel. Mounting brackets are 16-gauge. Leg tubes, mounting brackets and a saddle support bracket are fully welded together using continuous full welds to form a structurally solid, freestanding frame.
