

Product Specification

Integrity Gas Lift Task Height Chair

Seat Shell

The Integrity Ribbed Back Seat Shell is a one-piece soft polypropylene shell designed with an ergonomic hourglass shape, allowing for proper lumbar and high back-shoulder support. 13-reinforcement ribs are required to eliminate the need for any additional back support tubes or seat support brackets. The seat is attached to the frame by means of six steel rivets attached to a fully welded engineered mounting bracket. Seat shells must have a handle grip hole. Other custom colors available based on minimum volume.

Frame

Frame is a five star black nylon base. Gas cylinder number 80 adjustment 16"-19". Heavy duty seat plate with direct contact adjustment level.
