

Product Specification

Smooth Cantilever Chair

Seat Shell

The Smooth Shaped Seat Shell is a one-piece soft polypropylene shell designed with an ergonomic hourglass shape, allowing for proper lumbar and high back-shoulder support. The smooth back features a blow molded cavity for the ultimate comfort flexible back. The seat is attached to the frame by means of six steel rivets attached to a fully welded engineered mounting bracket. Seat shells must have a handle grip hole. Other custom colors available based on minimum volumes.

Weight (lbs.)

Junior 12": 14 lbs.
Junior 14": 14 lbs.
Senior 16": 17 lbs.
Senior 18": 17 lbs.

Freight Class

150

Frame

Leg tubes are heavily reinforced 12-gauge tubular steel and are 1" round in diameter. Mounting brackets are 16-gauge. Leg tubes and mounting brackets are all to be circumferential welded to form a structurally solid, freestanding frame.
