# kae

The Kae tiered pieces provide a collaborative space for brainstorming. Creative use of the 3 different shapes enables an entire room to be outfitted with the Kae. All while providing ample space for all team members to allow their creativity to flow effortlessly.

## flexxform

## Design

Kae features two and three-tier steps that can be arranged in many different ways to provide the ideal setting for each unique environment. Two-tier corner pieces are also an option for surrounding the perimeter of rooms and optimizing space and design. USB and A/C Receptacle options are also available to ensure users can stay connected in every way.

## **Performance**

All of the foam components are environmentally friendly and California TB117 compliant

---

India Tape is utilized in the seams to ensure Kae is kept bed bug proof

---

Kae's frame is constructed of solid Canadian hardwood with plywood components

---

All joins in the wood are glued and stapled to double the strength

---

Noise-canceling fabric is used to cover the back springs, to prevent unwanted squeaks and damage to the foam

---

Mayer Midway | Mayer Balance

## Kae Collection

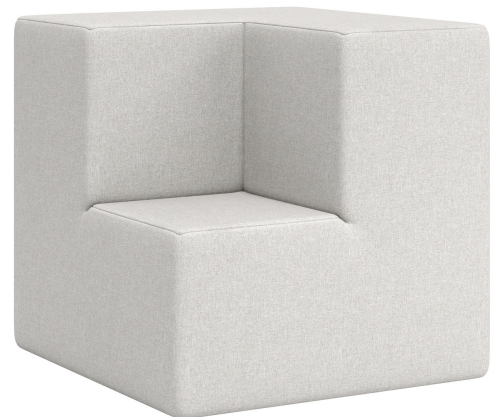

Designed by Francisco Silva

Growing up in the Azores Islands, Francisco moved to Canada in 1976.

After moving to Canada, Francisco spent 16 years working for other companies, before starting a soft seating manufacturing company, Azores Furniture. Every original design was carefully crafted and developed by him. Although more designers have been introduced to the team, Francisco's craftsmanship-like skill continues to play a large part in improving and introducing designs.

Francisco has the eye to take a simple intangible image and turn it into a tangible reality. And not only that but every detail of the design is also considered to ensure every product has the maximum quality and cleanliness.

Even after the ownership change to Flexxform Designs, Francisco is still a vital part of the Flexxform team, coaching, improving, and designing!
