## Height-Adjustable Teacher Lectern

The height of this teacher's lectern can be quickly adjusted from 28 to 45 1/4 inches, and due to the castors it can be easily moved around the classroom. Teachers can smoothly shift from standing and presenting to a group of students, to sitting down one-on-one with an individual student, in seconds.

To ensure unimpeded mobility, the work space is compact and the integrated storage space is minimized. Additional storage needs are covered by a separate teacher storage element, found on the next page.
