h: 19 5/8-27 1/2

Continuous Height Adjustment

The **PantoMove** and **PantoMove-Plus** chairs are height adjustable, so the seat height can quickly and easily be changed according to individual requirements.

The seat height of the **PantoMove** can be adjusted from 13 1/4 to 16 3/4 inches in our smaller model and from 16 1/2 to 21 1/2 inches in our larger model.

The adjustability of the **PantoMove-Plus** ranges from 19 5/8 to 27 1/2 inches, making it suitable for working at sit-to-stand and standing tables.

Adjustable Foot Ring

The **PantoMove** and **PantoMove-Plus** can be fitted with a patented adjustable foot ring. With the touch of a button it can be positioned so that the feet can be placed at exactly the right height when sitting. This takes the strain off the thighs.

3D Rocking Mechanism

The **PantoMove** has a patented 3D rocking mechanism for even greater dynamic sitting. The seat area reacts to every change of weight and leans gently forward, backward, or sideways. In this way, it continuously supports changes between different sitting positions in an ergonomically sensible way.

Chair Hanging

Many models of the **PantoMove** come standard with a piggyback hook for chair suspension on tabletops. The underside of the hook is made of non-slip material. That way the chair stays firmly on the tabletop and the surface of the table is protected, allowing for easy cleaning of the floor and tabletop.

Castors or Glides

The **PantoMove** is available with castors specifically for hard or soft floors. Alternatively, there are three varieties of glides also available. 2-component universal glides are specifically designed by VS to protect hard floors, yet can be used on all floor types. Plastic glides are recommended for carpeted floors, and felt glides are another option for hard floors.

Castors

Hard castors for use on carpet.

Soft castors for use on hard floors.
