

# REBUTTED & REJOINTED

## shingle specifications

### 1. Product Description.

Shakertown® R&R shingles are composed of kiln-dried Western Red Cedar Shingles. The shingles are trimmed so side edges are parallel. The butt ends are sawed smooth at right angles to the side edges.

**Dimensions:** Lengths are nominal, 18” and 24”. Shingle widths are random, 3” minimum and 14” maximum. 18” R&R shingles are approximately .45” thick, and 24” R&R shingles are approximately .50” thick.

**Styles:** The 18” R&R shingles and 24” R&R shingles are available with a natural sawed face, sanded face or machine grooved (combed) face.

**Finishes:** Manufactured in unfinished, natural Western Red Cedar. Products may be stained or painted in the field. All shingle styles are also available with a factory applied oil-based primer on all sides. Factory priming will minimize the opportunity of natural extractive bleeding. (Refer to Technical Bulletin 4001, Stains & Finishes)

**Basic Uses:** Shakertown R&R shingles are used on exterior and interior walls when a high quality shingle appearance is required. The architectural history of shingle siding used throughout the United States includes application on colonial, shingle-style, Victorian, rustic cabin, ranch, bungalow, contemporary and modern homes.

**Packaging:** Shakertown R&R 18” shingles are packaged in one square cardboard cartons and half square cartons. 24” shingles are packed in 4-carton squares.

**Coverage:** One full carton of 18” shingles covers 100 sq. ft. at 14” exposure (double course application)<sup>1</sup>, or 50 sq. ft. at 7” exposure (single course application). The 24” shingles are sold in 4-carton squares, with one carton covering 25 sq. ft. at 7-1/2” exposure (single course application). Refer to the coverage table for accurate material requirements.

### Coverage & Exposure Table

One square carton coverage of machine-grooved shakes, rebuted-rejointed shingles and sanded face shingles at indicated weather exposure: (e.g., No. 1 18” @ 14” exposure = 100 sq. ft.)

Shingle Length	Exposure		8”	9”	10”	11”	12”	13”	14”	15”	16”
	6”	7”									
18 inch*	43	50	57†	64	72	79	86	93	100†	—	—
24 inch **	80	93	106	120	133†	146	160	173	186	200	213†

\*Sold in 1 square and 1/2 square cartons.

\*\*Sold in 4-carton squares.

† Maximum single course exposure.

‡ Maximum double course exposure.

### Maximum Exposures:

18” single course, 8” exposure

18” double course, 14” exposure

24” single course, 10” exposure

24” double course, 16” exposure

**SHAKERTOWN**  
CEDAR SHINGLES SIMPLIFIED

1. Double course coverage requires undercoursing shingles to achieve proper application.

**Fasteners:** Rust-resistant, hot dipped galvanized, 4D box nails are recommended. Pneumatic siding nails with a rust resistant finish may also be used.

**Fire-Resistance:** Shakertown R&R shingles, when fire-retardant treated by Shakertown, will provide a permanent Class A Flame Spread Rating.

**Preservative Treatment:** Shakertown R&R shingles may be CCA treated for protection against fungal decay.

## 2. Technical Data.

**Applicable Standards:** Number 1 Grade Shakertown R&R shingles are manufactured from Number One Grade Western Red Cedar Shingles. Finished shingles conform to commercial standard CS199-55 for natural grooved and R&R shingles.

## 3. Availability and Cost.

Distributed throughout the United States and Canada by stocking wholesalers. For distributor information and/or current competitive prices in your local area, call 1-800-426-8970.

## 4. Maintenance.

The performance of this material will vary according to geographical conditions and quality of applied finish. For maximum performance Shakertown recommends a quality oil-based stain or finish. Please refer to Technical Bulletin 4001, Stains and Finishes.
