### Using The Phone Holder

- Place the cradle on top of the base. Secure the cradle by sliding it down until it is firmly in place.
- Try the phone holder on the dashboard to find a suitable spot to mount. Clean the desired area well with clean cloth and cleaning alcohol. Remove as much excess dust and dirt as possible from the dashboard.

- Peel off the protective plastic film from the suction cup.

- Place the suction cup on the desired location. Press down firmly on the suction cup to have good adhesion.

- While holding down the suction cup, rotate the top of the suction cup clockwise until it locks into place.

- You may rotate the top of the suction cup counterclockwise to release the lock then lift the tab to remove the adhesive base in case you want to change location for the suction cup.

- Adjust the cradle to the desired height. Press on the two side buttons of the arm simultaneously, meanwhile rotate the support arm until it sits on dashboard firmly. Then release both buttons to lock the support.

- Lower the bottom tabs of the cradle so your device can sit securely.

- Release grip hands by holding down both buttons on the top side of the cradle. Continue to hold until the hands reach their maximum width.

- Place your device like in the diagram so that it is resting on the bottom tabs that you lowered in step 8.

- Using your hands, gently squeeze in the grip hands from both sides until your device is securely held.

- Lift up the locking lever. You can now change the viewing angle of the cradle freely.

- Once you have found the desired viewing angle, push the locking lever down to lock the cradle into place.

- You can now rotate your device with the cradle 360 degrees to find a desirable setup for your device. Enjoy!
