⌘⌘ Screen capture for Windows PC

### More about mode

1. Shortcut mode is restored to default mode after UCKEYE loses power, e.g. when unplugged from a computer or a computer is shut down or restarted.
2. In either Shortcut mode or Function key mode, one can also press "Fn" key with one of top row key simultaneously to perform the secondary function without switching mode.

## Keyboard Shortcuts for MacOS X

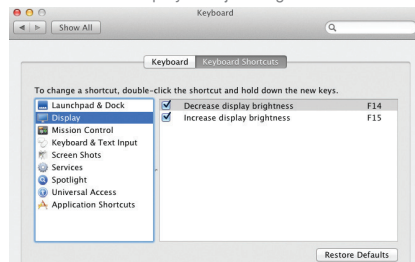

Previous section has described 15 default shortcuts and function keys. They are supported in MacOS X 10.11, macOS Sierra and above, no driver installation is needed. Please note, these shortcuts are not universal, certain shortcuts such as Zoom in and Zoom out do not work as defined in some application such as Microsoft Word and Excel because these applications have their own way of zooming. On the other hand, some shortcuts may act completely different way in different applications. You should try them out first.

In MacOS X, if shortcuts Brightness adjust and Zoom do not work, please configure Keyboard Shortcuts to enable them:

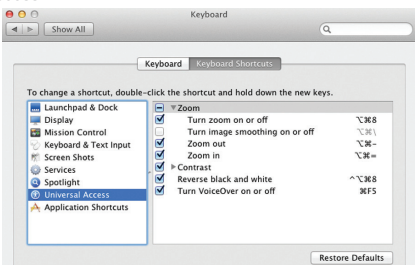

1. Open System Preferences, double click to open Keyboard icon, then select Keyboard Shortcuts tab.

2. If your computer has a built-in display, you can enable shortcuts F14 and F15 under Display to adjust brightness.

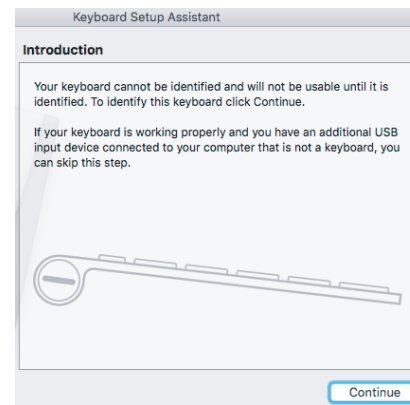

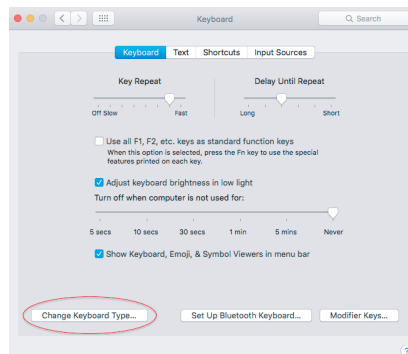

3. You can enable shortcut Zoom in and Zoom out under Universal Access.

## Keyboard Setup Assistant

In Mac, the first time you plug in this new keyboard to use, desktop will pop out a "Keyboard Setup Assistant" window, Please follow the on-screen instruction to identify the keyboard before you can use the keyboard correctly.

After initial setup, if you experience any issue with keyboard or couldn't type correctly, please unplug and replug the keyboard, open keyboard icon in System Preferences, click on "Change Keyboard Type" icon to run Keyboard Setup Assistant to re-identify the keyboard.
