

# Grocery Store Scavenger Hunt

Shop in an eco-friendly way. Go “green” at the grocery store!  
Use the below guide to make environmentally friendly decisions while you shop.

.....

## Eco-Friendly Grocer Guide

### Bring Your Own Bag

Where: At Checkout

Why: Paper and plastic bags often end up in landfills. Avoid producing waste by recycling your own bag.

### Choose Less Packaging

Where: Dry Good Aisles

Why: Excess packaging produces waste. Fresh, whole foods are good for our bodies and environment!

### Buy Seasonal and Local

Where: Produce and Bakery Departments

Why: Local products save energy and fuel. These goods do not have to travel as far as other products.

### Buy in Bulk

Where: Bulk Bin Area (rice, nuts, etc)

Why: Buying food in larger quantities means less packaging and energy waste.
