

# Grocery Store Scavenger Hunt

Grab your grocery store receipt to explore costs, addition, and division!

Calculate the total cost of preparing Butternut Squash Mac & Cheese.

<u>Item</u>	<u>Cost</u>
Butternut Squash	<input type="text"/>
Box of Pasta	+ <input type="text"/>
Block of Cheddar Cheese	+ <input type="text"/>
Quart of Whole Milk	+ <input type="text"/>

Total Cost

**Challenge:** Use *division* to calculate the cost of feeding each person eating your mac & cheese!

$$\frac{\text{Total Cost}}{\text{Number of people served}} \div \text{Number of people served} = \frac{\text{Total Cost}}{\text{Number of people served} \times \text{Number of people served}} = \text{Cost per serving of mac \& cheese}$$
