

# THE BOARD 500VB

VACUUM & UP-AIR PRESSING TABLE

Pressing on a regular ironing board eventually leads to a damp ironing surface, making it impossible to get a clean, crisp finish for your garments. The 500VB with vacuum and up-air provides the user with the same tools that professionals count on.

The secret to great finishing is to keep the ironing table dry by removing the steam from the fabric. Use vacuum for pressing a shirt or putting in a crease, while up-air (blowing) is great for delicates, removing the risk of leaving an impression or crushing the nap.
