

# 4k-121-75PI

## Reverse Osmosis Drinking Water System

- Healthier & Better Tasting Drinking Water
- Affordable for Any Household or Business
- Excellent Service & Quality spanning over 29 years
- Simple Installation
- Fits under most common sinks
- Reliable warranty (8 years limited warranty)
- Can be connected to hot or cold water dispensers
- Made in U.S.A
- Wonderful system for homeowners and environmentalists. This system operates at an industry leading one to one ratio production, whereas traditional reverse osmosis systems waste about 4 to 8 gallons of water depending on incoming water pressure.

The Alkaline K SERIES-75PI is one of the best water purifying systems in the market that produces Natural Alkaline Calcium Ionized water. Unlike water ionizers, this system uses a special kind of filter built with natural stones to add Calcium, Magnesium, and Potassium to your water after cleaning the water up to 98% by a reverse osmosis membrane. Reverse Osmosis is a way of separating dissolved solids and organic matter from water by passing it through a special membrane. The membrane separates toxic chemicals and inorganic minerals and other impurities from the tap water. This system is capable of producing clean, refreshing ALKALINE IONIZED WATER up to 75 gallons per day (GPD). The water production depends on the feed water supply pressure, temperature and quality.

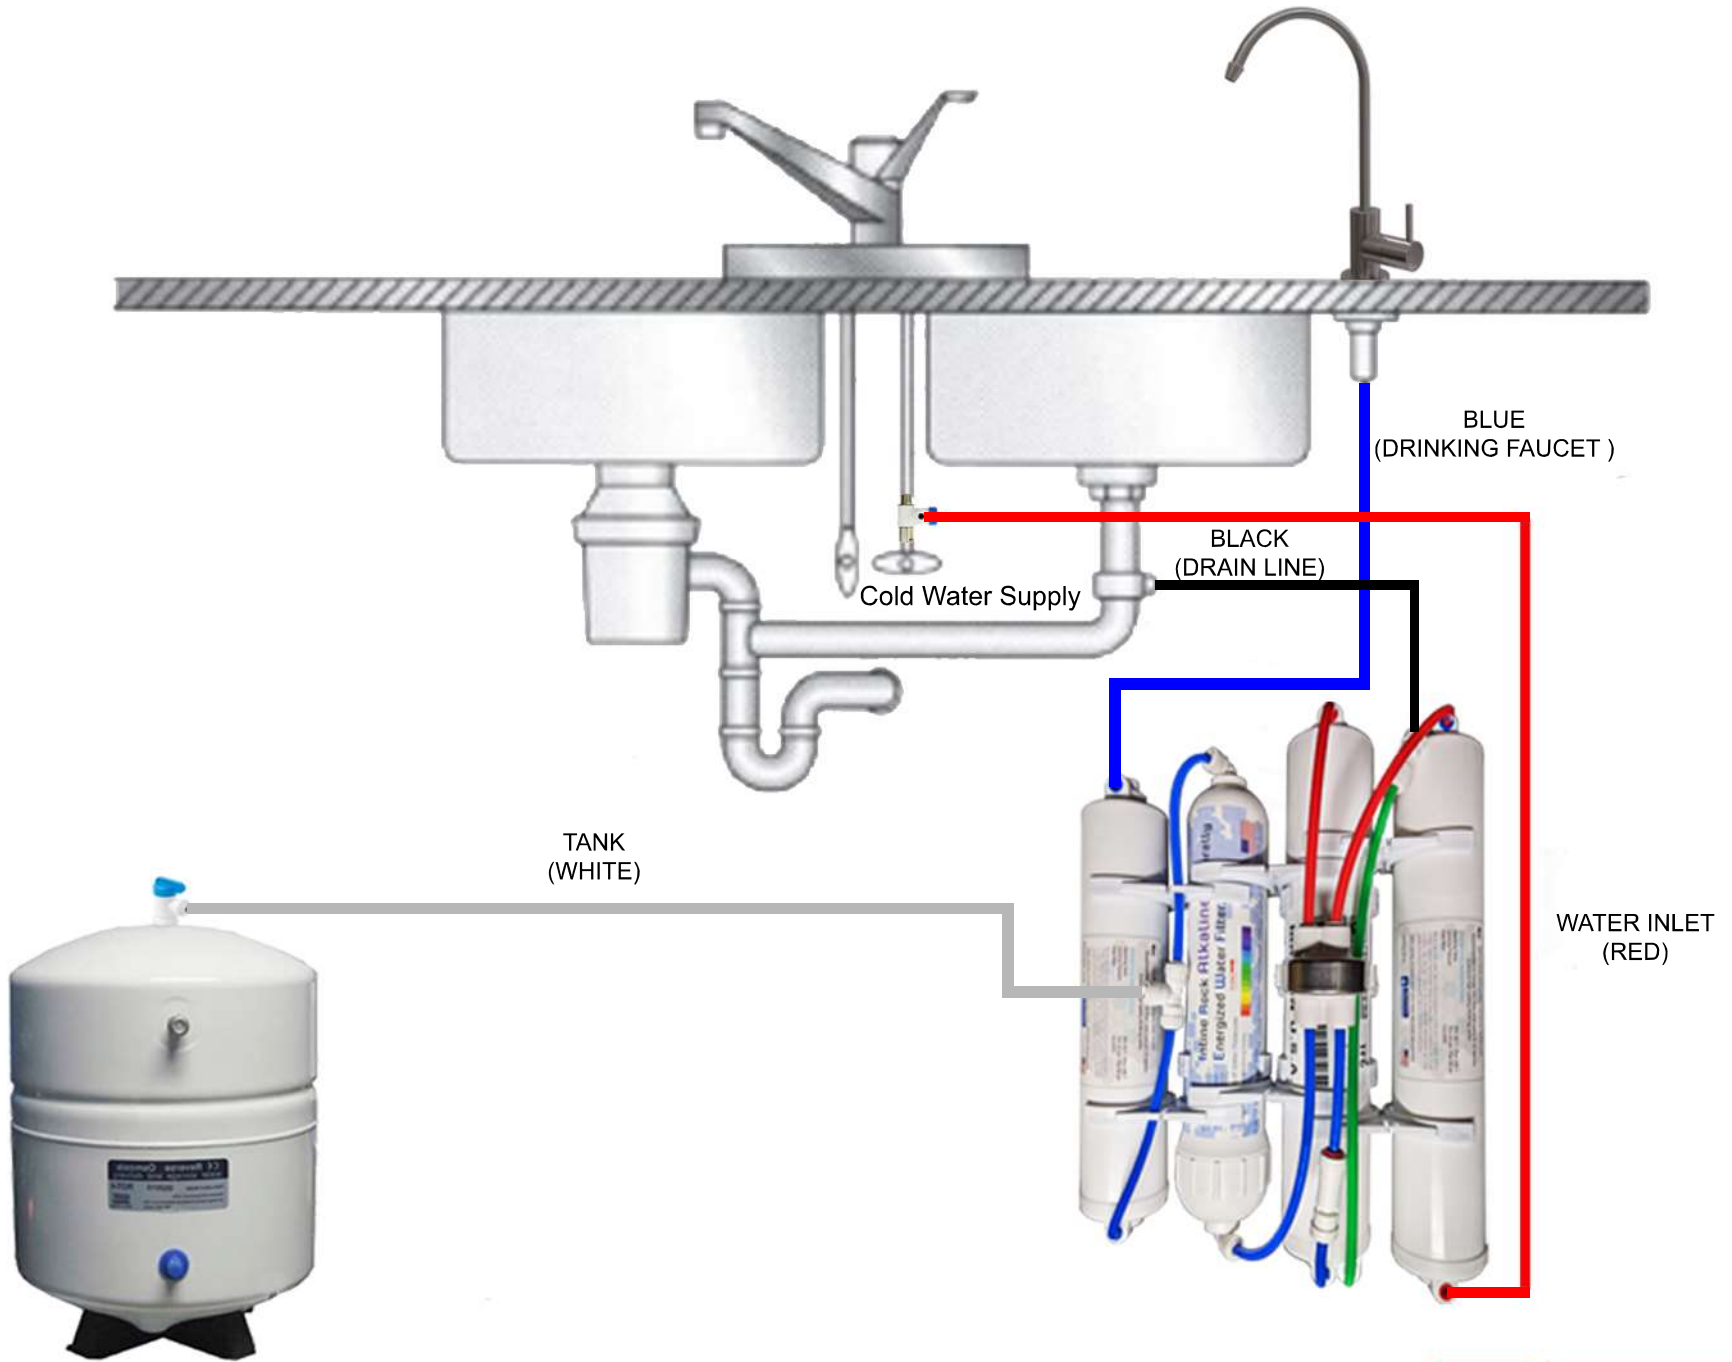

### Specifications:

- Operating Temperatures: Maximum 100°F (37.8°C) Minimum 40°F (4.4°C)
- Operating Pressure: Maximum 80 psi (5.90 g/cm<sup>2</sup>) Minimum 40 psi (2.80 kg/cm<sup>2</sup>)
- PH Parameters; Maximum 11 Minimum 2
- Iron: Maximum 0.2 PPM
- TDS (Total Dissolved Solids) <1800 PPM
- Turbidity: <5NTU

### Dimensions (L x W x H):

System: L 13"  
W 4 1/2"  
H 16"

Tank : H 16"  
D 9"

Love Your Water.
