# aqua-C Water Softener

The aqua-C control valve has been engineered to provide years of trouble-free service. The key to the exceptional quality of the aqua-C control valve is in the state-of-art design. The aqua-C valve is one of the most advanced controls available.

## FEATURES:

- Solid state microprocessor with easy access front panel setting
- Three modes of operation: Meter immediate, meter delay, or time clock delayed
- Double backwash feature - Offers optimum regeneration, cleaning ability, and efficiency
- 36 selectable, per-programmed regeneration cycles
- Day override features 1-28 days available
- Backwash and brining ability to 21" diameter tanks
- Down-flow /up-flow regeneration
- Store system configuration and operation data in non volatile memory
- Capacitor back-up with two-hour power carry over
- Control valve design provides optimum service and backwash rates

Optional Bypass Valve

## Additional Features:

High quality, cation water softener exchange resin. Tough, high density, polyethylene salt storage tank. Additional features available to match any decor. Full five year control valve warranty, ten year tank warranty. Electricity cost per month is approximately 10 cents.

# aqua-C Softener System

AQUATRON

Love Your Water.

Many water supplies contain hardness minerals (calcium and magnesium), iron, rust and sediment. These minerals form a scale and create problems in water heaters, washing machines, dishwashers, coffee makers, humidifiers, and plumbing systems. The aqua-C softener is capable of reducing and removing the unwanted contaminants, providing your family with a refreshing difference in water quality and saving you money now and in the years ahead.

## ***Benefits of aqua-C WATER SOFTENER***

### ***In The Bathroom:***

Your soap and shampoo will lather better. Your hair and skin will feel noticeably cleaner, softer, and not as dry as before. Additionally, there will be no soap scum or mineral deposits to clean off sinks, showers, tubs, and toilets.

### ***In The Kitchen:***

Dishes will clean up more easily and be spot-free, without the gray film which glass gets when etched by mineral laden water. Plus hands will feel softer and look better.

### ***In The Laundry:***

Clothes will be softer, cleaner, whiter, and brighter. Plus they will last longer. Using soft water and pure soap products increases the life of clothing, towels, and linens up to 33%. Without hard water, washing machines will last longer too.

### ***Plumbing & Appliance:***

Appliances that use soft water will last longer and run better. Why? Because hot water heaters, washing machines and dishwashers using hard water can wear out 30% faster.

## ***Soft Water Savings***

Over time, soft water savings can really add up. For instance, conditioned water not only delivers greater washing power, it reduces the amount of soap you need to use by up to 70%. In fact, the Bureau of Sanitation found that between 17 and 21 cents of every dollar are spent on cleaning products. Soft water can reduce that bill by up to 65%. It can also eliminate extra rinse cycles and use of hot water. Plus, using less detergent, household cleaners, and chemicals is better for the environment.
