PISTOLS - AIRGUNS - SHOTGUNS

THE BRITISH ICON SINCE 1790

**W**e can trace our origins and heritage back to 1790 in Birmingham, England, and since our inception Webley has been synonymous with innovation, dedication and above all seen as one of the most iconic English Firearms brands to date.

Incorporating registered brand names including Webley & Scott as well as Webley, our time-proven ethos of combining heritage with technology whilst never losing sight of the

consumer's desire for value is demonstrated in everything we do. Webley has a very strong history in the Indian market and from 2019 onwards, we are proud to be manufacturing and serving this market from India.

We have established a brand new manufacturing facility just out of Lucknow in the Uttar Pradesh State and this has been designed to ensure that every product that is produced meets and exceeds the standards that Webley is known for.

Using the latest machinery combined with modern manufacturing techniques and finished to the strictest of quality control, every Webley product will please even the most critical of consumers.

Webley has some very ambitious plans for production within India and are excited to bring you not only time-proven designs, but also to be a leader in new design, innovation and development within the firearms market.

With plans to manufacture Revolvers, Pistols, Shotguns, Airguns and many other related products, Webley is here to stay!

## .32 AUTO PISTOL

Using over 200 years of experience, Webley are immensely proud to bring you the new WP20 .32 Auto Pistol. Designed from the ground up and using the most up-to-date manufacturing and design techniques as well as superior modern materials. Featuring a small compact frame and supplied with 2 size double stack magazines - 9+1 Shot compact magazine sits flush to the grip which makes it easy to carry, whilst the 12+1 magazine extends out of the grip giving a full size feel in the hand. Combined with a light-weight polymer frame, the WP20 features an ergonomic ambidextrous design to suit all hand sizes whilst pointing and feeling like a full size handgun when mounted.

# WEBLEY MKIV

## .32 POCKET REVOLVER

### TYPE C

Webley first manufactured revolvers in 1853 with their first model which was a percussion style. The iconic Webley Revolver was borne of this original design and the MKIV .32 Pocket & Overhand Pocket model uses a similar design along with many of the proven features of the .320 Hammer model from 1899.

The strong and reliable hinged frame automatically ejects spent cartridges, facilitating speedy reloading and giving a faster rate of fire than solid frame revolvers. The Pocket series of MKIV is fitted with a compact grip that makes it easy to handle as well as easy to conceal.

Now manufactured in India, the MKIV type C has been based on the draw original designs and has all the same great features including the famous Webley finish that has shown the test of time.

Supplied in Wooden Presentation Case

## .32 OVERHAND POCKET REVOLVER

### TYPE C

Using the exact same design and manufacturing as the standard pocket model, the Overhand Pocket model features a slightly larger grip that fits larger hands better as well as fitting snugly into a holster.

Each MK IV .32 Revolver is made to exacting tolerances and must pass a rigorous Quality Control process that we demand of all Webley products and the result of this is a weapon that will last many generations to come.

Finished with a deep rich blue that Webley is famous for and presented in a wooden presentation case, the MKIV is everything the market has been asking for.

1911 .45 AUTO

## TIME PROVEN DESIGN

The 1911 has earned a reputation worldwide as the go-to side-arm for many applications including civilian and military. The new WP4523 from Webley takes this time-proven design of the traditional 70 series whilst adding the style, finish and quality that Webley is famous for. Chambered in 45 ACP with a 4.25" button rifled barrel, smooth lines and snag-free design allows for quick draw in fast need situations. Includes fully adjustable low profile rear sight and high visibility fiber optic front sight. Supplied with 7+1 Shot Detachable magazine and with stylish G10 grips for ease and comfort when shooting.

Originally designed and manufactured in England, the Webley Tomahawk provides the user with a well-balanced and powerful spring-powered air rifle that not only looks great but shoots accurately. Featuring an ambidextrous wood stock, precise steel rifled break

barrel action, machined scope grooves, POWR-LOK mainspring, automatic re-settable safety catch and fully adjustable two-stage quattro trigger. Made for serious airgun shooting with full adult dimensions and power to match!

# Webley

# SOME OF THE GUNS THAT MADE WEBLEY WORLD FAMOUS.

**The Royal Irish Constabulary Revolver, 1867.**

Adopted by the Royal Irish Constabulary in 1867, this solid frame, single and double action revolver became known as the R.I.C. model, and at the time would have cost the owner a few shillings.

A year was passed by Her Majesty General George A. Carter, Lieutenant Colonel of the 7th U.S. Cavalry by Lord Wellesley in 1849, and when General Carter died at the Battle of the Little Bighorn fighting American Indians in 1876, his Webley revolver was a trophy.

**The Boxer Revolver, 1865.**

A solid frame, cruetty iron, double-action revolver, the Boxer was designed to carry the most powerful hard gas cartridge of the day - the .577 Hornet.

It was a formidable weapon, and until the advent of the .44 and .46 Magnum, it possessed greater stopping power than any other hard gas. The fact probably accounted for its popularity. It was an age of small wars against local natives, at a time when the Adams and Foster .450s were the standard British service revolvers, and as many contemporary accounts noted, they simply weren't heavy enough to stop a charging war.

**The British Bulldog, 1878.**

This .442 and .400 calibre revolver was based on the famous R.I.C. model, and with a barrel only 2 1/2" long was designed purely as a short-range near support. It was produced in large quantities, and it gained a reputation for dependability throughout the world which it still holds, particularly in South America.

**The Webley .32 Automatic Pistol, 1909.**

Perhaps among the newspaper articles in 1909 which asserted that British revolvers were going to be replaced in popularity by foreign-made automatic pistols, Thomas Webley hastened the development of a line range of British-made self-loaders.

The .32 shown above became the official weapon of the Metropolitan Police after passing its worth in the Safety Society Test in 1911, and was also adopted by many overseas police forces.

It is a compact, well-organized design, simple and strongly constructed, and, although small, it's highly accurate.

**The Webley-Green, 1887.**

The Peace-makers of the British Empire was the nickname the Army gave to the Webley-Green .430, 436 and .455 break-action, single-action-revolver. They were adopted by the Navy in 1887, and later by the Army as their standard service, and they're still considered to have the finest double action of any revolver made.

**The Longspur, 1853.**

The Longspur was the first Webley production revolver, and it's much imitated today by imitators. It's a cap and ball muscle loader with a powerful compressed air trigger.

It's a cap and ball muscle loader with a powerful compressed air trigger. It's a cap and ball muscle loader with a powerful compressed air trigger. It's a cap and ball muscle loader with a powerful compressed air trigger.

**The Webley Marks I-VI Revolver, 1896.**

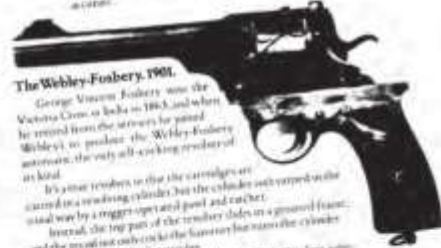

The Marks I to VI (shown is a Mark III) were used in many small wars, and saw some service in both the Boer War and the Great War. Some 30,000 Mark V's were produced between 1911 and 1914, and the Mark VI remained the standard service rifle until the mid-1920s.

The gun was also popular for self-protection, and fact of course, I think will remember that the companion of the legendary 'The Mark' Holmes, Dr. Watson, carried one.

**The Webley Mark IV Police Revolver, 1924.**

Developed from the Mark III range of police and pocket revolvers, but with a shorter trigger pull, the Mark IV .32 and .38 calibre are well supplied to police and armed forces in many parts of the world to this day.

**The Webley-Fosbery, 1901.**

George Vincent Fosbery was the Victoria Cross holder in 1863, and when he retired from the services he joined Webley to produce the Webley-Fosbery automatic, the only self-loading revolver of its kind.

It's a semi-revolver in that the cartridges are stored in a revolving cylinder, but the cylinder isn't carried in the usual way by a trigger-operated pistol and rather, instead, the trigger part of the revolver slides in a grooved frame, and the rotation of the cylinder is done by the cylinder itself, using a toothed carriage.

The Webley-Fosbery is in fact the only self-loading automatic made, and the Webley-Fosbery is a highly accurate and reliable.
