

# Instructions

## Masts:

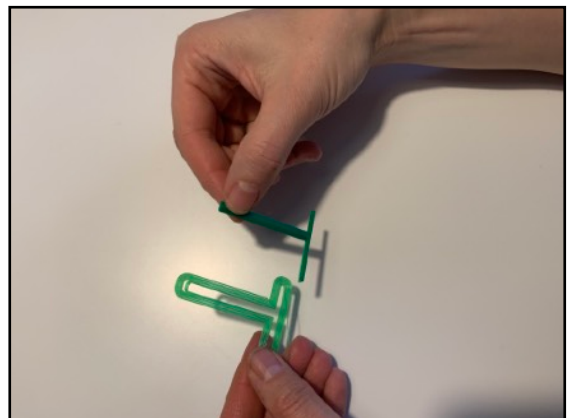

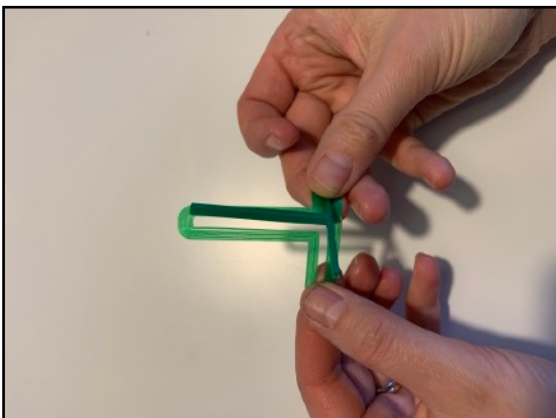

The masts for the Coach Kits and Team Race Kits are shipped with the 3D support still attached for better shipping. It is very quick to peel the support filament from the printed structure before inserting the mast into the mast support of the 3D Optimist.

1. Take the mast and hold it so that the longest part points away from you and start peeling from the top part towards you.

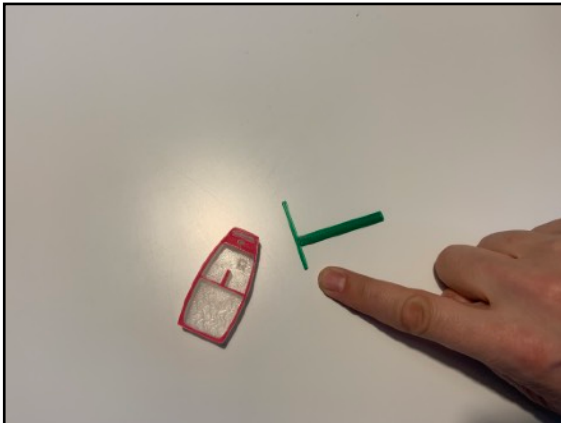

2. Peel the complete support away from the mast until you hold the mast without support in your hands and the mast is round. Sometimes you need to still peel one or two strings from the mast side.

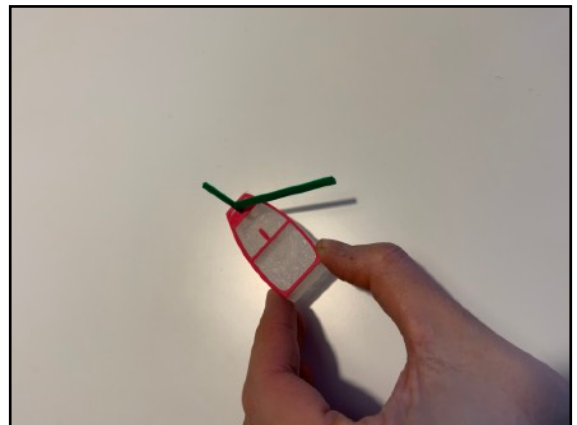

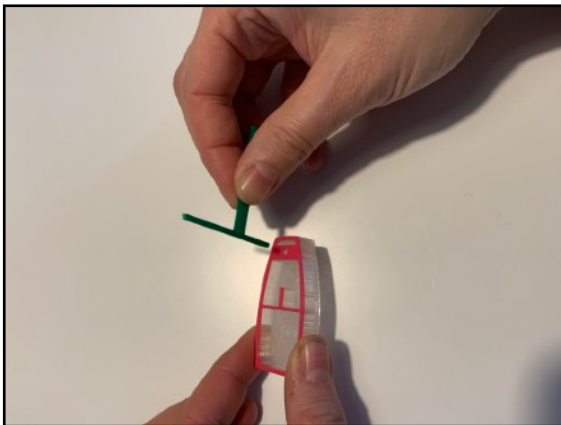

Version 1.0

3. The mast should be free of all strings from the shipping support.

4. Take the mast by the T-joint with the short part pointing downwards and insert into the mast hole of the 3D Optimist you are ready to go.

## 3D Optimist Magnets:

The included 3D Optimists come ready to be used on magnetic boards. The boats have a pre-printed snap-in place for the provided 10x1mm round magnets. Simply turn the boat upside down and snap-in the magnet. A little pressure needs to be used to force the magnet into place.

## Race Mark Magnets:

The included race marks come ready to be used on magnetic boards. The marks have a pre-printed snap-in place for the provided 8mmx0.75mm round magnets. Simply turn the make upside down and snap-in the magnet. A little pressure needs to be used to face the magnet into place.

**WARNING:** The Coach Kit and Team Race Kit contain small parts and must be kept away from small children age 0 - 3 years old.
