

# MAB ELITE SERIES GLASS DOOR PATCH FITTINGS NEW

To complement the glass door locksets shown on page 156 opposite, we have introduced the MAB Elite Series of glass door patch fittings. Having many years of experience in architectural glass products, MAB have developed the Elite Series patch fittings to allow quick and easy installation of glass doors. These patch fittings ensure the highest possible clamping due to their compact size. These heavy duty patch fittings are suitable for all toughened glass applications.

The range is fully compatible with the MAB floor springs shown on pages 130-131.

Material:	Aluminium.
Finish:	Standard patch fitting finish is natural anodised aluminium silver. Pivots are satin chrome plated. Other finishes are available, please call for details.
Glass thickness:	Adjustable to suit glass thickness 8mm - 12mm.
Door type:	Suitable for single and double action doors.
Pivot point:	Wide adjustment range of 52-58mm from door edge
Door weight:	To suit up to 100kg doors.
Fixing:	Supplied with Centellen seals.
