

# ZERO V3 FULL BODY STRENGTH THRESHOLDS

Zero thresholds are renowned for being heavy duty and specified widely because they pass the test of time and weight. The heavier gauge material in our thresholds allows you to drill and screw right through into concrete whereas lighter gauge thresholds can buckle and often loosen because screws cannot be tightened fully.

Taking this requirement for heavy loadings a step further, Zero has developed an aluminium composite filler containing aluminium oxide and silicon carbide which can be used to fill the void beneath the threshold. This gives added strength to the threshold. Ideal applications include heavy commercial traffic in warehouses, manufacturing buildings, schools, cafeterias, car dealerships, hospitals and industrial buildings. V3 full body strength is available to special order only and can be supplied with all Zero thresholds, but we list the most popular patterns below. To order, add -V3 after the product code. Example 544A-V3. Supplied as standard undrilled with no holes (NH).

ZERO 6.4MM LOW FLAT THRESHOLDS WITH V3 FULL BODY STRENGTH INFILL	
REF	DESCRIPTION
544A-V3*	102mm wide x 6.4mm high with V3 full body strength infill
545A-V3*	127mm wide x 6.4mm high with V3 full body strength infill
546A-V3*	152mm wide x 6.4mm high with V3 full body strength infill
547A-V3*	178mm wide x 6.4mm high with V3 full body strength infill

Dimensional product drawings on page 18

ZERO 12.7MM HIGH FLAT THRESHOLDS WITH V3 FULL BODY STRENGTH INFILL	
REF	DESCRIPTION
654A-V3*	102mm wide x 12.7mm high with V3 full body strength infill
655A-V3*	127mm wide x 12.7mm high with V3 full body strength infill
656A-V3*	152mm wide x 12.7mm high with V3 full body strength infill
657A-V3*	178mm wide x 12.7mm high with V3 full body strength infill

Dimensional product drawings on pages 20-21

# ZERO STAINLESS STEEL THRESHOLDS

Aluminium thresholds are generally suitable for use on external doors. However in particularly harsh environments it may be decided to use stainless steel thresholds. These are manufactured from 3mm thick Grade 304 stainless steel, and available in three patterns. Lengths: 1000mm and 2100mm drilled for CSK screws.

**FIRE:** These three stainless steel thresholds have been assessed by Exova Warringtonfire for use on previously fire tested (or assessed by Exova Warringtonfire or Chiltern International Fire) insulated and uninsulated steel-based doorsets which have achieved up to 240 minutes integrity, and where appropriate insulation, in accordance with BS EN 1634-1:2014, without detracting from the overall performance of the doorset. The doorset may be of single-leaf or double-leaf configuration. Copy of WF Assessment Report No 387313 Issue 3 dated 31.08.2017 available on request.

**CAUTION:** These are not grooved and may become slippery in wet conditions.

Z654ST 100MM WIDE X 12MM HIGH STAINLESS STEEL THRESHOLD	
REF	DESCRIPTION
Z654ST-1000	1000mm long, grained finish, drilled and csk
Z654ST-2000	2100mm long, grained finish, drilled and csk

Z544ST 100MM WIDE X 6MM HIGH STAINLESS STEEL THRESHOLD	
REF	DESCRIPTION
Z544ST-1000	1000mm long, grained finish, drilled and csk
Z544ST-2000	2100mm long, grained finish, drilled and csk

Z63ST 75MM WIDE X 6MM HIGH STAINLESS STEEL THRESHOLD	
REF	DESCRIPTION
Z63ST-1000	1000mm long, grained finish, drilled and csk
Z63ST-2000	2100mm long, grained finish, drilled and csk

# ZERO RUBBER RAMPS

Zero flexible rubber ramp thresholds are ideal for uneven floor surfaces and provide non-slip surfaces for building entrances. They can be easily cut on site with a knife or saw. Available sizes 1000mm and 2000mm. Supplied undrilled (NH) as standard.

Z59R 152MM WIDE X 12.7MM HIGH RUBBER RAMP - 12.7MM RISE FROM 0 - 12.7MM	
REF	DESCRIPTION
Z59R	152mm wide x 12.7mm high rubber ramp, black

All products usually available ex-stock except those marked with \*. Call for lead time. Additional manufacturers carriage charges may apply for \* items. No charge for split boxes, but please try to order boxed quantity multiples where possible.
