

ZEROPLUS DNP SWING DOOR PROFILE

Meeting stile seal for double or single swing doors. The aluminium profile that secures the seal is pre-drilled to accept screws. Standard lengths 2240mm and 2500mm. The seal is available in three widths to suit different door thicknesses. Please note that the seal projects less as it gets flatter when it is used on thicker doors. The fin on the seal may be mounted inside or outside the profile to ensure a good seal. Please see selection tables below. It may be used singly or in pairs. Not fire rated.

WHICH SEAL TO USE?

For door thicknesses 32mm to 40mm: use 55mm wide profile.
 For door thicknesses 40mm to 50mm: use 60mm wide profile.
 For door thicknesses 50mm to 60mm: use 75mm wide profile.
