

ELLEN BLISTER PACK SELF-ADHESIVE DIY SEALS

Sometimes only a small quantity of self-adhesive seal is required, rather than a full coil. Blister packed for merchandising in sales-counter areas, all these seals suit non-fire rated applications. They are PSA backed so all are quick, easy and clean to apply to frame head and jambs. Please note that the surface preparation must be clean, warm, dry, grease free and dust free. Ambient air temperature must exceed 7°C during installation. These seals are also available in 100 metre coils to special order.
