

SLIMPORT ACOUSTIC CIRCULAR VISION FRAMES NEW

SLIMPORT-STC ACOUSTIC RATED CIRCULAR METAL VISION FRAME ASSEMBLY

The new Slimport-STC is an acoustically tested circular vision frame set. This latest addition to the Slimport range enables us to now offer aesthetically pleasing vision frame solutions for acoustic doorsets.

Slimport-STC has been tested with the most popular glass types we are asked to supply here in the UK; 6.4mm Laminated, Pyroacet, Pyroshield 2 and 9mm Firelite. The vision frame comes with Sound Sealing Tape applied to the underside perimeter of both frame sides, or supplied separately if requested. **CAUTION:** Sound Sealing Tape should not be exposed to a heat-treating process from post factory applied finishes, such as powder coating.

Tested size SP450. Tested in accordance with BS EN ISO 10140-2:2010 Acoustics - Laboratory measurement of sound insulation of building elements. Measurement of airborne sound insulation. Testing conducted at Exova, High Wycombe, UK. Copy of test report available upon request.

For square or rectangular acoustic vision frame sets, please see the LOPRO-STC shown on page 80.

SLIMPORT-STC WITH ZPGT SOUND SEALING & GLAZING TAPE

34dB with 6.4mm Laminated Glass

SLIMPORT-STC WITH FS9009 SOUND SEALING & GLAZING TAPE

34dB with 6mm Pyroacet Glass

34dB with 7.2mm Pyroshield 2 Glass

36dB with 9mm Firelite Glass

SLIMPORT-STC CIRCULAR ACOUSTIC RATED METAL VISION FRAME ASSEMBLY WITH ZPGT SOUND SEALING & GLAZING TAPE (GLASS NOT INCLUDED)	
REF	DESCRIPTION
SP250-STC-GT-GV	To suit 44-46mm thick doors, 250mm diameter cut-out, 200mm diameter clear vision, zinc plated mild steel
SP250-STC-GT-SS	To suit 44-46mm thick doors, 250mm diameter cut-out, 200mm diameter clear vision, satin stainless steel
SP350-STC-GT-GV	To suit 44-46mm thick doors, 350mm diameter cut-out, 300mm diameter clear vision, zinc plated mild steel
SP350-STC-GT-SS	To suit 44-46mm thick doors, 350mm diameter cut-out, 300mm diameter clear vision, satin stainless steel
SP450-STC-GT-GV	To suit 44-46mm thick doors, 450mm diameter cut-out, 400mm diameter clear vision, zinc plated mild steel
SP450-STC-GT-SS	To suit 44-46mm thick doors, 450mm diameter cut-out, 400mm diameter clear vision, satin stainless steel

SP450-STC-FS-SS	To suit 44-46mm thick doors, 450mm diameter cut-out, 400mm diameter clear vision, satin stainless steel

SPECIAL FINISHES

Did you know that apart from our stocked finishes, we are also able to offer the Slimport range in a vast array of architectural finishes? These include bronze, brass and even special coloured translucent lacquers.

Most recently we launched two new black finishes, ZEROblack and LITEblack, to bring the range up to date with the recent increase in demand we have all seen for black architectural ironmongery. ZEROblack is a flat, matt style, finish giving a pure stunning black at all angles. LITEblack is a textured finish which enables light to catch the texture giving a multitude of black tones.

Please call for further details on the finishes mentioned above, or any other special finish requirements you may have.
