

HUCK GUN – 10256

The powerful Huck 10256 air gun designed for \varnothing 7.9 & 9.5mm (5/16" & 3/8") diameter Huck[®] fasteners.

Made in the USA, the 10256 Huck gun is the best in its class lock bolt & structural rivet gun. When it's Huck, you know it's proven technology that works. It features a high-quality aluminium alloy body, ergonomically designed handle and soft-setting installation to reduce operator impact. This tool has been built tough for the high-speed installation of Huck fasteners diameter sizes 7.9 mm (5/16") and 9.5 mm (3/8"). The 10256 provides optimum stroke for one-cycle installations, concentric (in-line) pull piston and a new front gland design, allowing for easy piston removal.
