V10 Sport
V10L
V10
(All Generations of V10 series)
V12 (2nd Gen.)

NOTES:
Dimensions are ± 2mm
Print page at actual size for 1:1 scale.

Always insert rudder pin into the bottom most hole when rudder is inserted fully into boat. It is not necessary for rudder pin to 'hang' or rest on interior tube, it only needs to be clamped within the T-bar.

In a pinch, the 4 hole shaft can be cut down to fit other boats. A sharp hacksaw will cut the shaft easily.
