Introduction

There are five texts related to each Learning Pathway in this early literacy program:

- The Program
- Teaching Guide
- Study Sheets
- Cloze Activities
- Rainbow Writing

Program Design

- There are four Pathways.
- Each of the four Pathways is divided into ten Steps.
- The Steps are broken into four Lessons.

Each of the four Learning Pathways has a scope and sequence which is divided into a series of ten steps. Each step represents a unit of learning which may be used over a number of days, or weeks, according to the learning needs of any given class group. Students should not be moved on to the next step unless they have reached mastery of the content in the current step. Each step is divided into four Lessons, each of which covers one day's literacy instruction.

Regular words for each set are based on the focus alphabet letters (e.g., u, c, n, k, v, b). Irregular words are those used in the First Books decodable readers. In this way, a small, select list of *new* words used for reading and spelling activities at each step in the scope and sequence, will immediately appear in a reading text. Each small set of words is continually added to the previous week's word list, thus allowing for cumulative review and maintenance of prior learning.
