- Elasticated waist with draw cord

### Chef Neckerchief

### Chef Beanie

Premium Food Grade Slip on Gumboot. Blood and Fat resistant.

### General Purpose Slip on Gumboot

# Disposable Suits

## Tychem 4000S

The new DuPont™ Tychem® 4000 S coverall provides a new alternative for workers seeking safe and comfortable protection in more demanding applications. The garment's fabric, comprising DuPont™ Tyvek® laminated with a chemical barrier film, presents wearers with optimum protection against a range of chemical environments and hazards while being supple and lightweight.

Tychem® 4000 S is ideal for chemical mixing, remediation and emergency response. It can be used in a variety of industries, including environmental clean-up operations, oil and gas, chemical engineering, hazardous material response teams and other emergency services.

## Tyvek 600+

Tyvek® 600 Plus is made of Tyvek®, but the coveralls offer the added benefit of protective design features and over-taped seams. They help provide an effective barrier against many water-based inorganic chemicals in low concentration, small sized hazardous particles and biological hazards. These coveralls are ideal for occupations that require effective whole suit protection offered by a Type 4 suit because they are exposed to heavy liquid aerosols or toxic airborne solid particulates. Yet, being robust and breathable they help offer an ideal balance of chemical, particulate protection and comfort.

## Tychem 6000F +

The new Tychem® 6000 F Plus offers a whole host of ergonomic features to help you perform in the most hazardous of environments, providing lightweight, durable fabric with comfort and safety in mind.

Smart design features: double cuffs, zippers & flaps  
Ergonomic design  
Barrier to organic and highly concentrated inorganic chemicals  
Lightweight, durable DuPont unique fabric  
Multiple use capability  
Protection made simple with innovative design

Tychem® 6000 F Plus offers industry-leading hooded coveralls with several innovative features for safety and comfort, including anti-static treatment, double cuffs & zippers as well as an ergonomic hood to ideally accommodate full-fitting face masks.

## Tychem 2000C

CE Certified, CAT III, Type 3 single use protective chemical overall. Hooded Hi-Viz yellow coverall. Elasticated wrist, face, waist and ankles. Thumb loops and self-adhesive chin flap for seal on face-masks. Splash or pressurised splash protection for use in a variety of environments including, food and chemical processing, pharmaceutical manufacturing, pulp and paper industries.

Tychem® 2000 C coveralls (model CHA5) help offer Type 3-B, 4, 5 and 6 barrier protection against a wide range of inorganic chemical and biological hazards, yet are lightweight and comfortable too. Protection against both chemical (concentrated inorganic chemicals and ultrafine particles) and biological hazards (meets EN 14126 requirements). Thanks to their ergonomic fit, they help wearers to handle even difficult tasks more easily and comfortably.

## Tyvek 500 Xpert

Its fabric offers a barrier to permeation by liquids when tested according to EN ISO 6529 Method A, performed on white Tyvek® fabric. It passes the new and more stringent Type 6 test method and demonstrates greater protection when tested according to the whole suit Type 4 spray test (EN ISO 17491-4 method B). Moreover, Tyvek® 500 Xpert sets a new standard in particulate protection, with only 0.8% whole suit inward leakage compared to 5% with Tyvek® 500 and to 8% with a typical Microporous Film (MPF). The excellent design and overall ergonomic shape of the garment ensures a perfect fit and protection whilst moving, across a whole host of applications.

## Tyvek 800J

Tyvek® 800 J is a new, limited-use Type 3\* chemical protective garment from DuPont that combines resistance to pressurised jets of water-based chemicals with breathability, durability and freedom-of-movement thanks to its 'Tyvek® Impervious Technology'. The outcome for wearers of the new Tyvek® 800 J is reassuring protection that is both comfortable and robust.

It has been designed for work in very humid applications requiring chemical, liquid and/or oil protection. Typical examples include:

- Industrial cleaning • Petrochemical installations • Sewers • Maintenance
- \* Additional taping of cuffs, ankles, hood and zipper flap required to achieve Type 3 liquid tightness.

# Chemical Protection

## Chemical Hood + Hardhat

- All seams welded
- Air Supplied
- 400 Micron clear visor
- Hard Hat incorporated
- Available without air supply.

## Chemical Pesticide Smock

## Chemical Bolero Apron

 All sizing benchmarked to SANS434

**CAUTION** - The prolonged use of PVC garments significantly raises body temperature and poses a danger of dehydration and heat exhaustion. These recommendations are based on laboratory tests, and reflect the best judgement of Leo Garments in the light of data available at the time of preparation and in accordance with ASTM F903-96. They are intended to guide and inform qualified professionals engaged in assuring safety in the workplace. Because the conditions of ultimate use are beyond our control, and because we cannot run permeation tests in all possible work environments and across all combinations of chemicals and solutions, these recommendations are advisory only. The suitability of a product for a specific application must be determined by testing by the purchaser. The data in this guide are subject to revision as additional knowledge and experience are gained. Test data herein reflect laboratory performance of fabric specimens and not the complete item. Anyone intending to use these recommendations should first verify that the item selected is suitable for the intended use and meets all appropriate health standards. Upon written request, we will provide a sample of material to aid you in making your own selection under your own individual safety requirements.

# Chemical Protection

## Chemical Overall

- All seams welded
- 40cm Double Leg
- 20cm Double Cuff
- Neck flap for additional protection
- No exposed cotton (except hems)

## Chemical Suit 2-Piece

- All seams welded
- 40cm Double Leg
- 20cm Double Cuff
- Neck flap for additional protection
- No exposed cotton (except hems)

## Chemical Full Air Suit

- All seams welded
- Air Supplied
- 400 Micron clear visor
- Fully ventilated
- Reflective tape

## Chemical Bib & Brace Pants

- All seams welded
- 40cm Double Leg
- No exposed cotton (except hems)

## Chemical Half Air Suit

- All seams welded
- Air Supplied
- 400 Micron clear visor
- Fully ventilated
- Reflective tape

## Chemical Wader

- Extra PVC sewn into seams for additional seal
- Double weld between upper and boot
- Chemical resistant gumboot
