

An underwater photograph of a sea turtle swimming over a coral reef. The sun is visible at the surface, creating a bright glow and lens flare. The water is clear blue, and the coral is vibrant and colorful.

PRESERVE THE LIVING SEAS

Marine
Cleaning Products
sustainability with performance

"As the first mate on SY Christopher, we gave Ecoworks Marine products a go. And instantly felt great about them. Finally doing the job, in an environmentally friendly way and not polluting the ocean. The teak cleaner is great to work with. It keeps the teak deck clean and without mould. The more we use it the better the teak gets. I would absolutely recommend it."

Andres Blanco Williams, SY Christopher

PRESERVE THE LIVING SEAS

Looking after our oceans is our responsibility. Many boats of all sizes are making better choices.

The Ecoworks Marine range is championing the sustainable revolution in our industry, by producing products that are biodegradable, IMO MARPOL compliant and plant based - that actually work.

In fact, we've heard they work more effectively than some of our chemical competitors.

Friendly for the oceans and healthier for you using the products.

Our two Doctors of biochemistry create very clever blends of bacteria and enzymes to clean specific areas and tackle stubborn problems. Our products will eat dirt in a natural way of cleaning rather than burning it off the surface.

"Converting the boat to become more Eco-friendly has been easier than imagined with the 'Preserve The Living Seas' range. It is easily accessible, cleans brilliantly, smells lovely and is MARPOL compliant, what more could you ask for!"

Teneale Stead Chief Stewardess, MY Chiqui

PRESERVE THE LIVING SEAS RANGE

15 cleaners – **developed on board** one of the most prestigious yachts in the world. We're pleased to say we cover the **complete cleaning needs of all boats & yachts.**

Interior range

NEW

ecofoam hand sanitiser

NEW: Alcohol & Quat free Foam Hand Sanitiser is approved for EN14476 & EN1276 and will kill 99.999% of common germs. It is made from naturally derived ingredients from plant derived resources making our products safer for the user and for the environment..

Our sanitiser is 100% biodegradable and will last twice as long as gel sanitisers.

Core Benifits

- Approved to **EN14476 & EN12276**
- **Alcohol Free** (non-flammable)
- **Kills 99.999%** of many common germs
- Virucidal and Bactericidal
- Up to 50% more washes unlike gels
- Contains Aloe Vera

You

- Offers **residual protection** unlike alcohol sanitisers
- Beauty industry tech to protect your hands
- Foam clings to hands unlike gels
- Free from dye or perfume

Environmental

- Chemical free
- pH neutral
- Full biodegradable and environmentally safe formula
- No animal testing
- VOC free
- Post consumer plastic, reuse, recycle and reduce CO2e
- 0% manufacturing waste

Sustainability

Our ethos is to produce products that are sustainably formulated using simple ingredients that perform well.

Our products are made from naturally derived ingredients from renewable and sustainably sourced raw materials. Which come from renewable and sustainable sources local to our UK manufacturing plant.

Our cleaners are formulated for the lowest possible toxicity and the ultimate biodegradability.

Cold blending processes are used to reduce energy consumption during manufacturing.

Ingredients

We aim to replace undesirable ingredients wherever possible by using blends of raw materials that are more favourable in terms of aquatic toxicity, sustainability and biodegradability. Nothing harmful is left behind

Our ingredients are a combination of biology, plant extracts, natural thickeners and naturally derived sustainable surfactants.

None of our products or raw materials have been tested on animals.

To see a list of used ingredients head to our website, you'll also see a list of ingredients found in many everyday cleaners that we promise to exclude.

ecoworks sanitiser

Phosphate-free and ultimate biodegradability

An effective all surface disinfectant and cleaner comprising of naturally derived organic acids and surfactants.

- Kills 99.999% of harmful bacteria
- Plant derived
- No animal testing
- Great for galley's & airconditioning ducting.
- Safe for the ocean
- Ready to use
- Contains mild lime and lemon fragrance

Our sanitiser is tested and approved valid against all coronaviruses, including 2019 n-CoV / SARS-CoV-2. (approved to EN14476 against enveloped viruses as defined in EN 14476:2013 + A2:2019.
