

Easy Use, Easy Go !

FT- 20 is a small portable machine, provides long time large volume output without recharging. This is especially convenient when the event is held outdoor where power access is not easy.

1. Using two types of power supplying mode, either by battery or switching power adaptor.
2. No need to preheat or reheat in the midst of output, the output fog remains strong and consistent.
3. In the battery mode, the machine can provide about 18 minutes continuously maximum output. Once operation finished, users simply switch off the power and the remaining power can save for future use.
4. Easy change to use switching power supply in the main frame, steady connection with easy convenient assembly and disassembly.
5. Rotary knob for adjusting fog output volume.
6. Optional remote with on/off and output volume adjust function.
7. Portable, Portable and Portable!!!

SPECIFICATIONS

Voltage	DC 12V (Battery)
Power Consumption	600 W
Fluid Consumption Rate	16 ml / per min (100% output)
Tank Capacity	400 ml
Operating Time	11 mins at max. output with battery
Control Options	DMX, Manual, Wireless (Optional), Cable remote (Optional)
DMX Channel Occupied	1 Channel, Output Volume
Optional Accessories	WTR-20 Wireless Remote Z-3 Cable Remote FT-20S Power base
Weight	8.5 kg
Dimensions (mm)	L293 W108 H238
Liquid Used	Antari FLM-05
