

# FT-50 Fog Machine

FT-50 is a compact, light-weight fog machine with tremendous output volume compare to others in its class.

Off power operation feature offers fire brigade mobility to move around and fill fog in training scene.

Newly designed heater block can better preserve the heat to increase operation time when off power.

Simple operation with a handle-mounted button, output volume can be adjusted through knob on the back panel.

## Features

1. Design for fire brigade training and applications require portability.
2. Handle-mounted button for operation
3. Adjustable output volume
4. Compact & light weight
5. Produce fog off power

## Preliminary Specification

<b>Voltage</b>	AC120V 50/60Hz AC230V 50/60Hz
<b>Power Consumption</b>	1,450 W
<b>Warm up Time</b>	7.5 mins (approx.)
<b>Fluid consumption</b>	110ml / min
<b>Fluid</b>	FLP-700 Aerosol
<b>Dimension (mm)</b>	346 x 153 x 251
<b>Weight</b>	9.8 KG
