Safety Instructions

WARNING

- Do not open this device, there is no user-serviceable parts inside. Risk of electric shock.
- Do not look at the light source when the device is on.
- **CAUTION:** This unit's housing may be hot during and after operation.
- Install this device in a location with adequate ventilation, at least 20 inch (50 cm) from adjacent surfaces.
- Do not leave any flammable material within 50 cm of this unit while operating or connected to power.
- Use a safety chain when mounting this device overhead.
- Do not operate this device outdoors or in any location where dust, excessive heat, water, or humidity may affect it.
- Do not operate this device if the housing, lenses, or cables appear damaged.
- Do not connect this device to a dimmer or rheostat.
- ONLY connect this device to a grounded and protected circuit.
- ONLY use the hanging bracket to carry this device.
- In case of a serious operating problem, stop using immediately.
- The maximum ambient temperature is 104° F (40° C). Do not operate this device at higher temperatures.

Power Input & Power Linking

This device has an auto-switching power supply work with input voltage range of 100~240 VAC, 50/60 Hz.

Link up to the maximum 8A. DO NOT exceed this.

Fuse Replacement

If the fine-wire fuse of the device fuses, only replace the fuse by a fuse of same type and rating.

Before replacing the fuse, unplug mains lead.

Procedure:

Step 1: Unscrew the fuse holder on the rear panel with a fitting screwdriver from the housing (anticlockwise).

Step 2: Remove the old fuse from the fuse holder.

Step 3: Install the new fuse in the fuse holder.

Step 4: Replace the fuse holder in the housing and fix it.

Product Installation

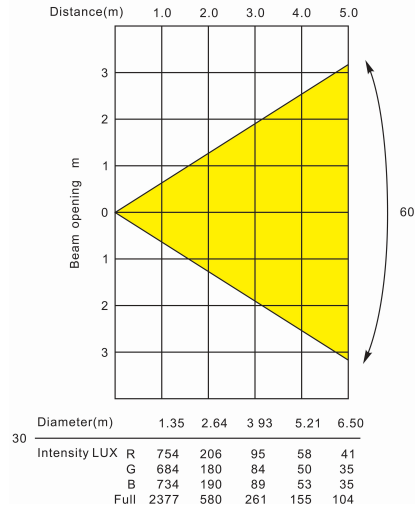

This device can be mounted in many orientations provided each individual device is secured by the use of correct mounting bracket.

Use a safety chain when mounting this device overhead.

CONTROL BOARD OPERATION

Press the Menu until one of the following had been displayed:

Display	Function
1.DMX Address	To set DMX address
2.DMX Channel	To set DMX channel modes: 4x1 Models - CH 03, CH 05, CH 09, CH12, CH17 2x1 Model - CH 03, CH 05, CH 06, CH09, CH11
3.Dimmer Curve	To set dimmer speeds: 01, 02, 03, 04, 05
4.Sound Mode	To set sound active mode and the sensitivity (Sen 000 ~ Sen100)
5.Static Color	To set static colors: R, G, B, RG, GB, RB, RGB
6.Manual Color	To set intensity of R, G, B separately for color mixing and strobe rate
7.Auto Program	To set built-in automatic programs and speed 000 ~100
8.Master/Slave	To set Master/Slave modes
9.Factory Set	To recover to manufactory default

Use "Up" and "Down" button to select your desired operation, press "Enter" to set all function

Set DMX address

After select the "DMX Address" and press "Enter", then use "Up" and "Down" to set the desired DMX address, press "Enter" again to confirm.

Set DMX modes

After select the "DMX Channel" and press "Enter", then use "Up" and "Down" to set the desired DMX mode, press "Enter" again to confirm.

Set Dimmer curve

After select the "Dimmer Curve" and press "Enter", then use "Up" and "Down" to set the desired dimmer curve, press "Enter" again to confirm.

Sound Mode

After select the "Sound mode", use "Up" and "Down" to set the sound sensitivity Sen 000 ~ Sen 100, press "Enter" to confirm.

Set Static Colors

Entered "Static Color", you can select the desired solid color via the "Up" or "Down" buttons, then "Enter" to confirm

Mode:	Value:	Function:
Static Color	Static color <R>	Red
	Static color <G>	Green
	Static color 	Blue
	Static color <RG>	Red + Green
	Static color <BG>	Green + Blue
	Static color <RB>	Red + Blue
	Static color <RGB>	Red + Green + Blue

Set manual mode Set up intensity of R, G, B separately for your color mixing and strobe function through control panel.

Entered "Manual color", use "Up" and "Down" to select intensity of R G B, use "Enter" to save your set for each step.

Use "Up" and "Down" to set strobe speed from Sp 000 to Sp 100, ("0" is freeze, "001 – 100" is slow to fast), then press "Enter" to confirm.

Automatic Mode

Set your built-in automatic program through control panel.

Entered "Auto Program" mode, use "Up" and "Down" to select the built-in auto run programs, press "Enter" to confirm.

Use "Up" and "Down" to select the operating speed of the auto program (Sp 000 ~ Sp100, freeze, slow ~ fast)

To setup multi fixture chases

Before starting, go to each fixture and reset the menu to fixture defaults.

1. On the master unit, setup the DMX address to the total number of fixtures in the string. For example, you may have a total of 20 par cans including the master, so the DMX address should be set to "20".
2. On the master unit, go to master/slave menu setting and set the unit to master
3. On the master unit, set the unit to "Auto Mode" "PrXX" which supports multi fixture chases.
4. On each slave unit, setup the DMX address to the fixture position in the string. For example, if this unit is the 2nd unit in the string including the master, then set the DMX address to 2. If this the last unit of 20, then the DMX address should be set to 20. It is possible to double up fixture positions as well as fixture 1.
5. On each slave, go to the master/slave menu setting and set it to slave.

Master/Slave Operation

1. Set the master fixture to one of the standalone operating modes: auto, sound, static color or manual color modes
2. Set the slaves, entered "Mas/Sla" mode, set to "s", press "Enter"

Factory set

To recover factory default, select the "Factory Set" and press "Enter", then use "Up" and "Down" to choose "Y" (yes), press "Enter" again to confirm to recover factory default
