

Bracelet Size Guide

Option 1: Measure your wrist with a string or ribbon

1. Take a string or a ribbon
2. Wrap the string / ribbon around your wrist, ensure that it gets the fit you want: snug on your wrist or a little loose
3. Find the point on the string or ribbon where the ends meet and mark it with a pen
4. Measure the length of the area marked with a ruler. BHappy Brand uses the sizing in centimetres. To convert inches in cm please use the chart below

Length in inches	4,7	5,1	5,5	5,9	6,3	6,7	7,1	7,5	7,9	8,3	8,7
Length in cm	12	13	14	15	16	17	18	19	20	21	22

Option 2: Measure your wrist with BHappy Brand’s Ruler

1. Print the ruler on the next page. Prior to that, go to the “Print settings” and ensure that:
 - The “page scaling” option is set to “none”
 - The page will be printed in A4 size (21 x 29,7 cm or 8.3 x 11.7 inches)
2. Position your credit card on the corresponding line at the top of the next page. If it lines up, your page has been printed properly
3. Cut out the ruler and create a slit by cutting under the dotted line
4. Wrap the ruler around your finger with the numbered side visible. Insert the tapered end in the slit and pull it through until the ruler gets the fit you want: snug on your wrist or a little loose
5. Check your size on the ruler
