prescription delivered right to
your door.

Important Information About Haelan 951.

- Haelan 951 is not approved nor intended to take the place of any type of therapy. Haelan 951 is designed to be used in conjunction with chemotherapy and radiation treatment.
- Haelan 951 has shown to :
 - Increase Appetite
 - Reduce Nausea and Vomiting
 - Reduce Diarrhea and Constipation
 - Reduce Cachexia (weakness and wasting)
 - Improve Blood Work
 - Reduce Tumor Markers

Your doctor can help you figure out the right dosage for you, but here are some general guidelines:

- Haelan 951 is typically prescribed pre-treatment but is also effective when started mid-treatment.
- Haelan 951 is typically continued post-treatment in order to help the body fully recover.

In adults, a general intake guideline is:

- 4 ounces consumed in morning on an empty stomach
- 4 ounces consumed in the evening on an empty stomach.

What's Next?

For Insured and Covered Clients:

Talking to your doctor about Haelan 951 is the first step. If together you decide that Haelan 951 is the right step, simply fulfill your order at Haelan951.com/order and submit your claim to your insurance company, if applicable.

For Insured, Non-Covered Clients:

Most insurance companies will cover your prescription if you follow the claim adjudication process. This may involve a Treatment Authorization Request (TAR) from your Doctor, or other similar forms. If you would like help navigating this process, please call 1-800-623-4082 to speak with a coverage specialist.
