Mature height x width: 40-60' x 40-60'

Light: Full sun

Moisture: Dry to moist

Soil: Sand to clay

Tolerates... Drought, alkaline soil, clay soil, occasional flooding, air pollution.

Does not tolerate... Excessive salt spray

Ash replacement? ✓

Buckthorn replacement? ✗

Shoreline buffer zone? ✗

Seasonal interest: Interesting bark

Resilience to climate change: High adaptability

Pollinator and wildlife value: High

Other notes:

A sturdy and reliable shade tree with interesting corky bark. It has an upright and rounded form with arching branches. Adaptable to a variety of soil conditions and moisture levels it's considered a low maintenance tree. Small berries are a summer time treat for wildlife. An excellent ash replacement.
