indi™

La guía para principiantes
para aprender programación

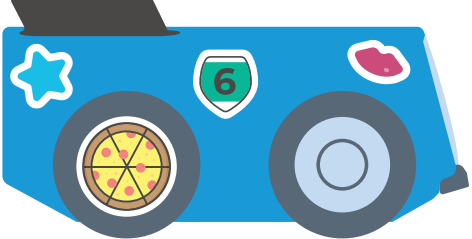

Adéntrate en STEAM con indi, el robot de aprendizaje más accesible y sencillo para niños.

Gracias al sensor de color incorporado y a las tarjetas de color, indi ofrece infinitas oportunidades para avivar la creatividad de los niños.

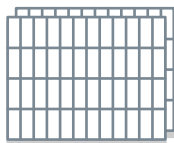

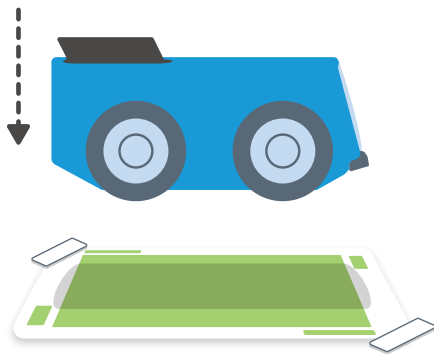

indi inspira un aprendizaje expansivo, relacional e imaginativo basado en juegos. Construye laberintos personalizados, resuelve rompecabezas y toma el control del volante para conducir. Pon en marcha la programación con aún más opciones para despertar el interés por la informática en la aplicación gratuita Sphero Edu Jr.

¡Abrochate el cinturón y descubre cómo funciona indi!

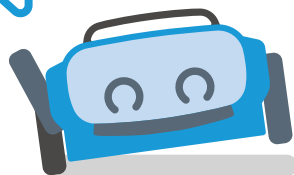

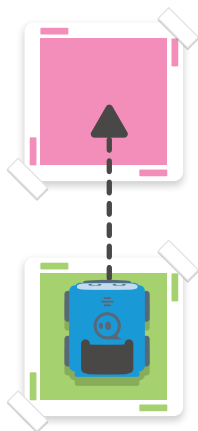

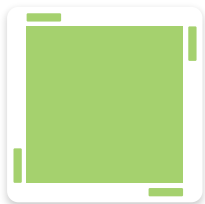

Se puede utilizar la cinta blanca para ayudar a sujetar las tarjetas de color.

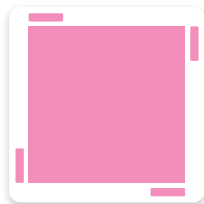

Asegúrate de que indi
está orientado en la
dirección que tiene que ir.

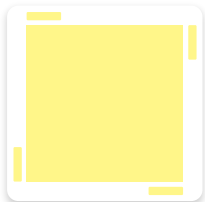

Verde 

¡Vamos!
¡Más rápido!

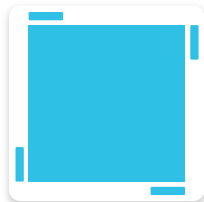

Rosa 

Girar 90°
a la izquierda

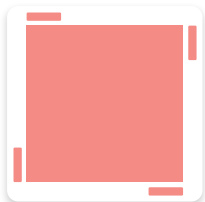

Amarillo 

Más lento

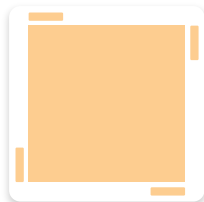

Azul 

Girar 90°
a la derecha

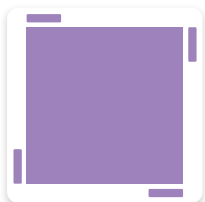

Rojo 

Detener

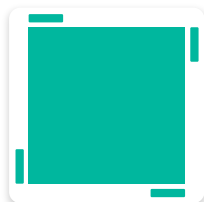

Naranja 

Girar 45°
a la izquierda

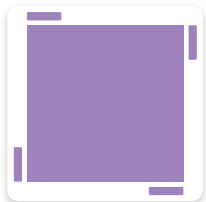

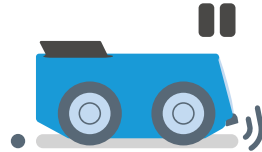

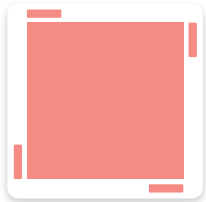

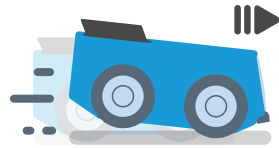

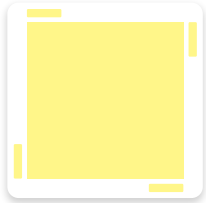

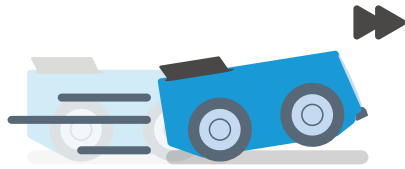

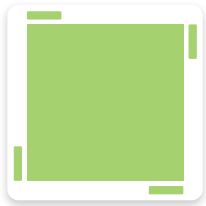

Morado 

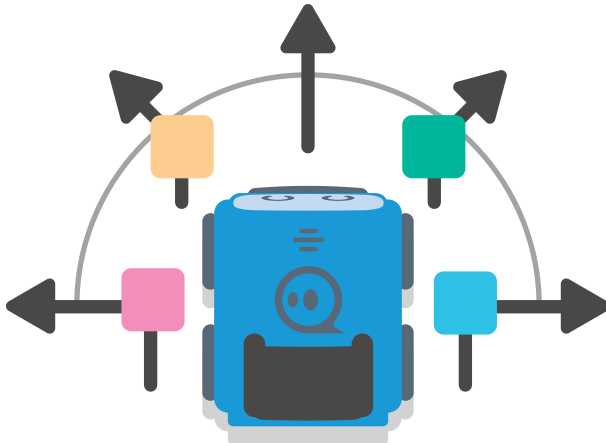

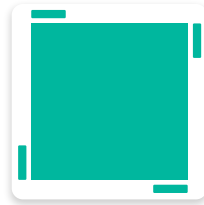

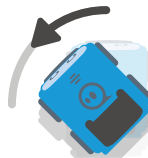

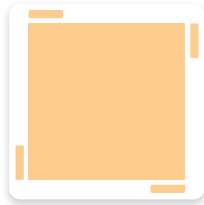

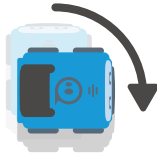

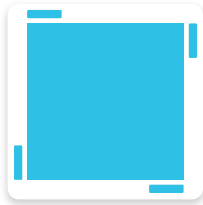

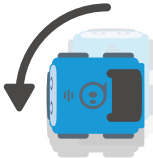

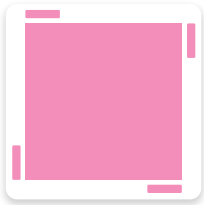

¡Fiesta!

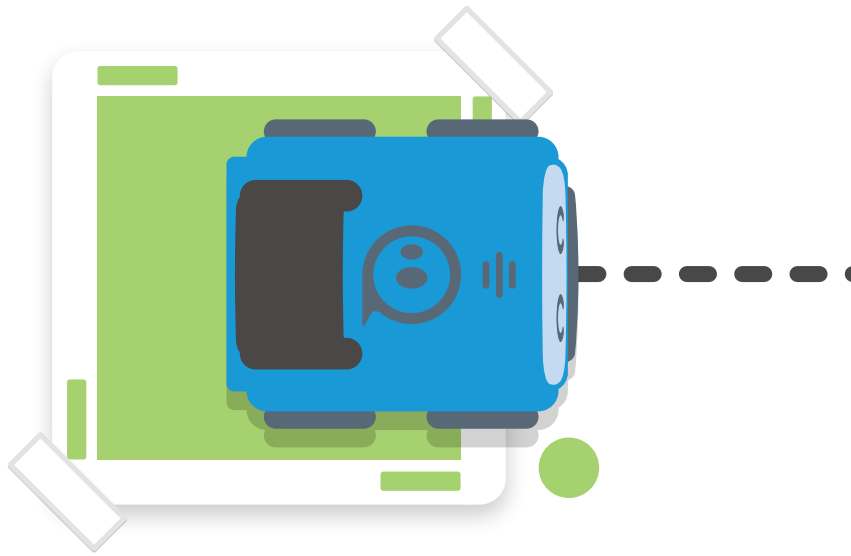

**Verde
azulado** 

Girar 45°
a la derecha

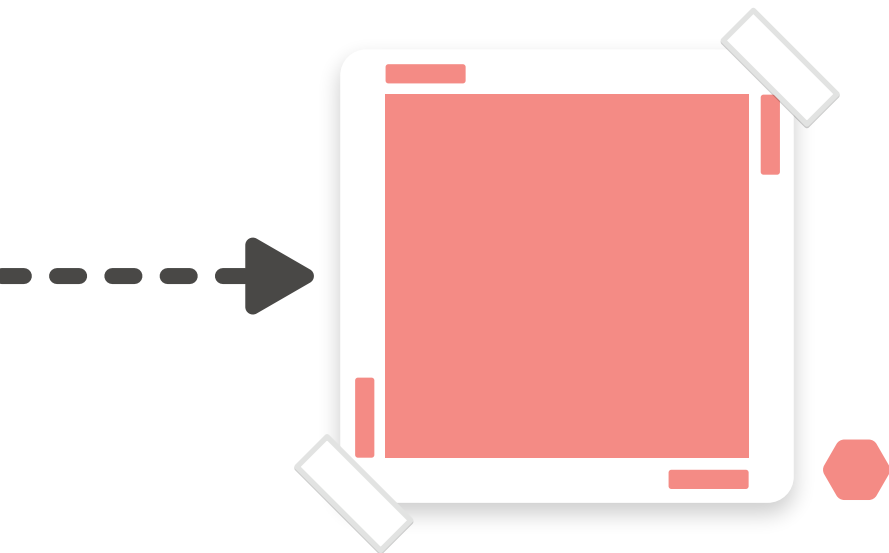

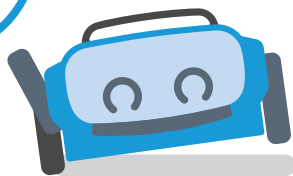

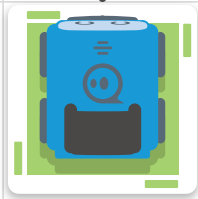

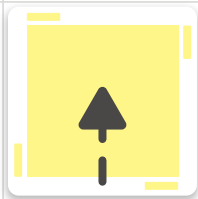

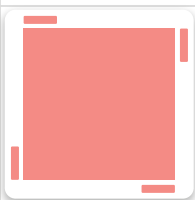

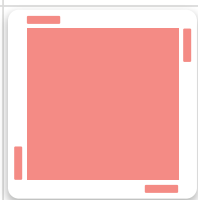

Asegúrate de que las tarjetas de color se colocan primero unas cerca de otras para entender mejor cómo se mueve y funciona indi.

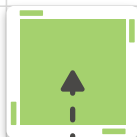

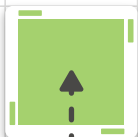

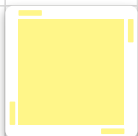

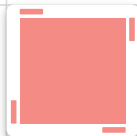

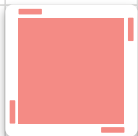

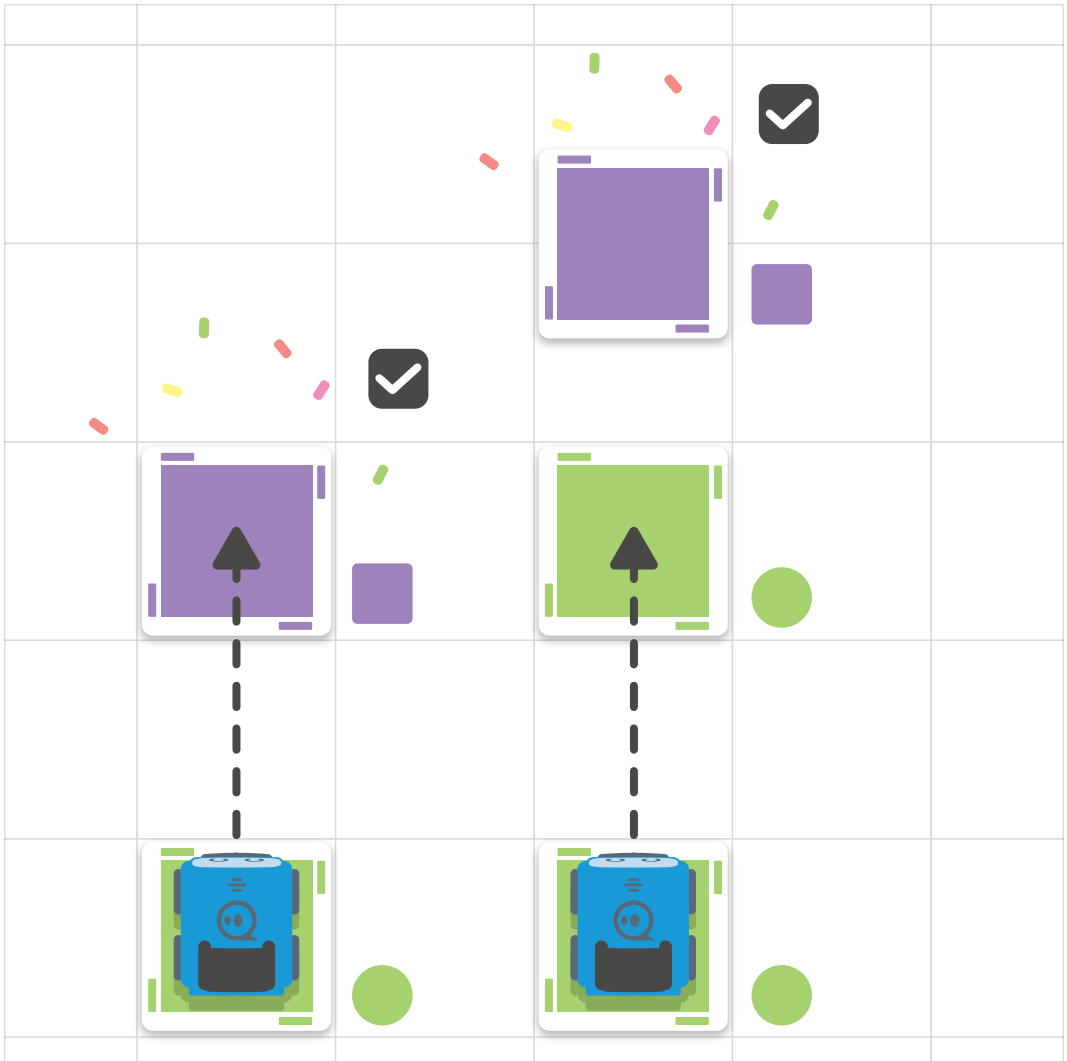

indi dejará de avanzar
cuando haya recorrido 1 metro
si no detecta otro color.

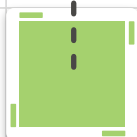

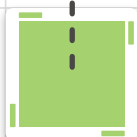

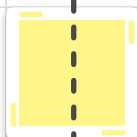

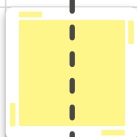

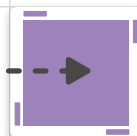

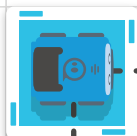

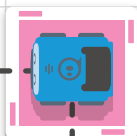

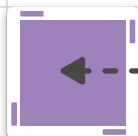

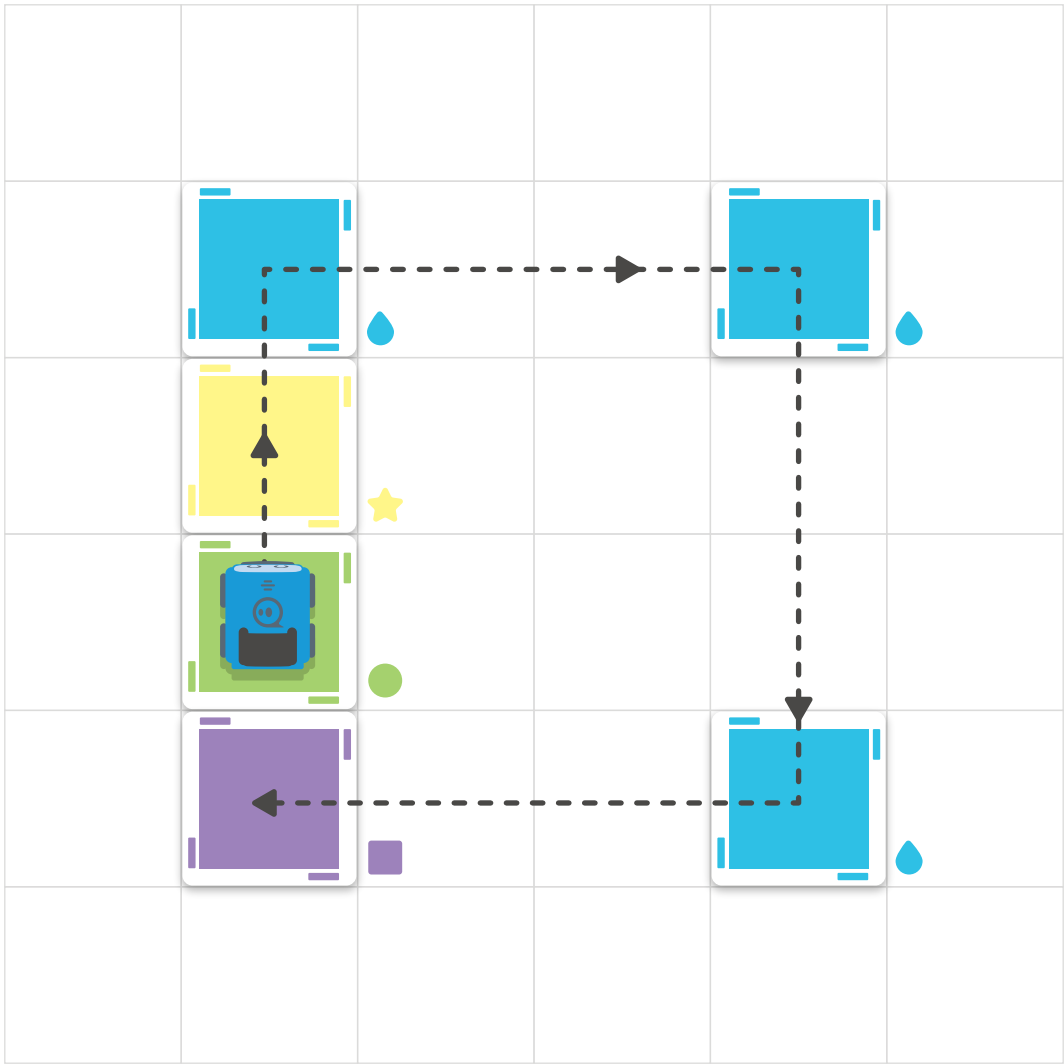

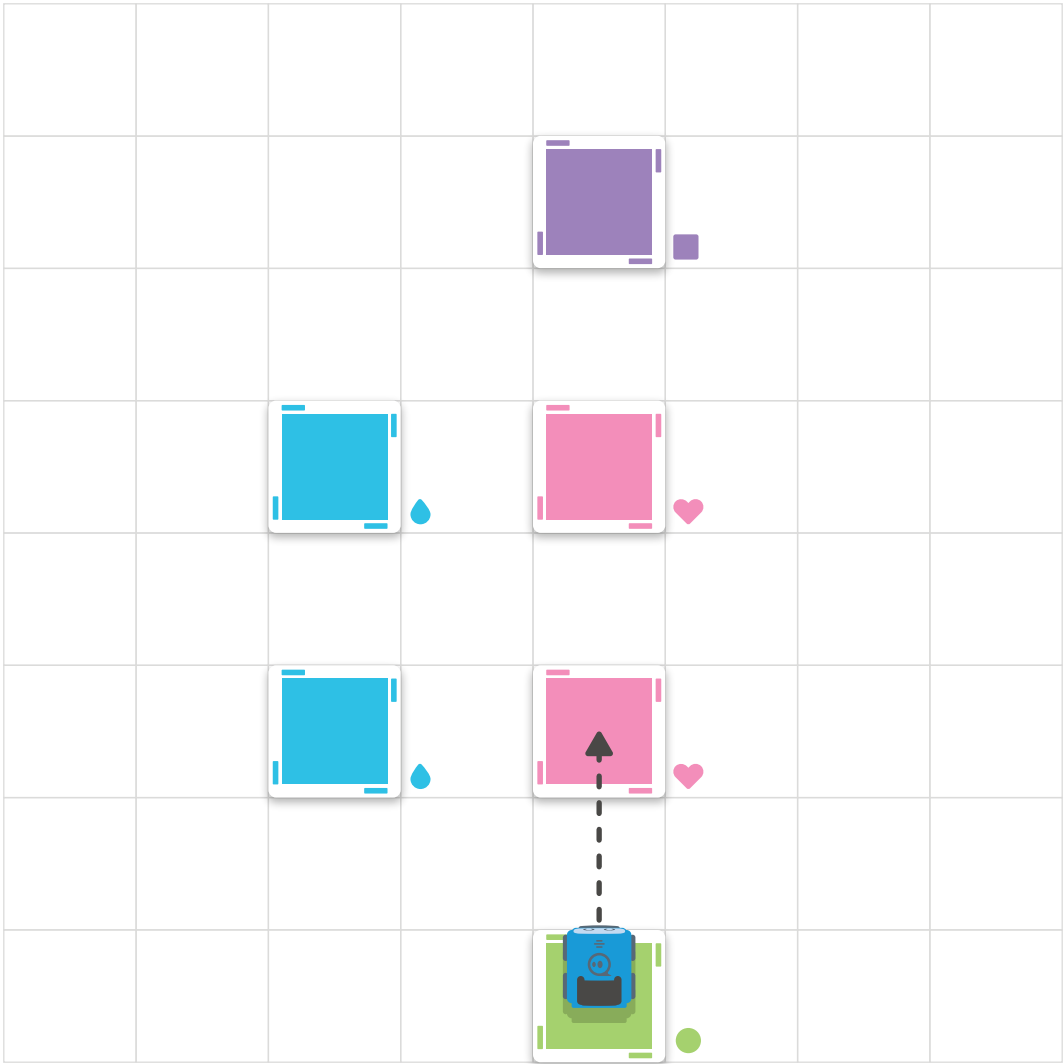

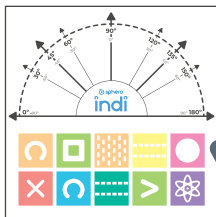

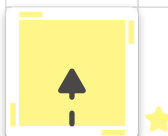

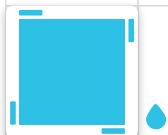

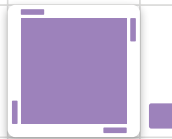

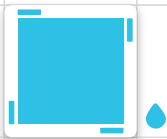

Si indi va más lento,
hace mejores giros.

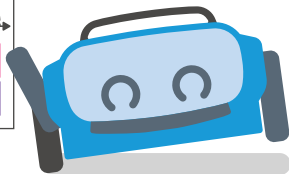

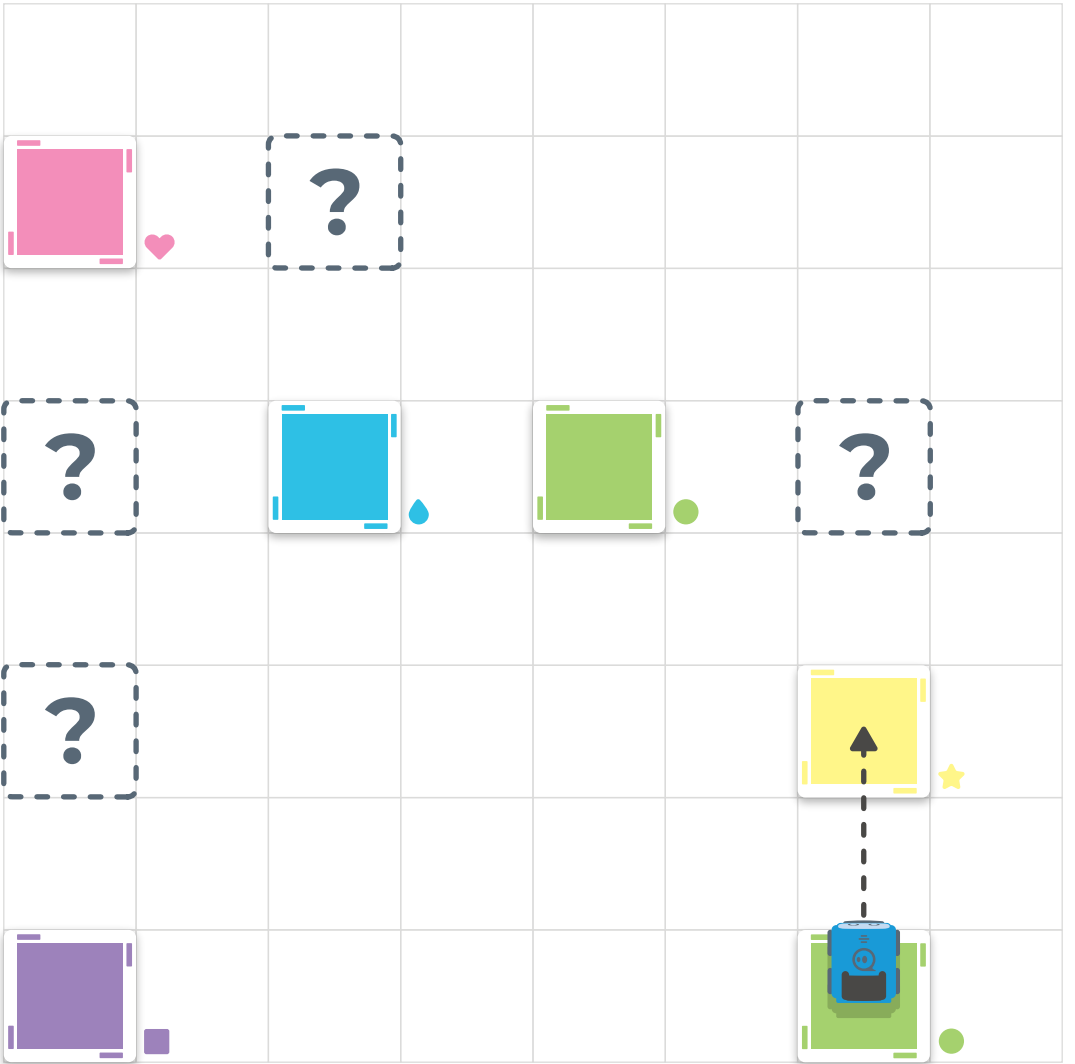

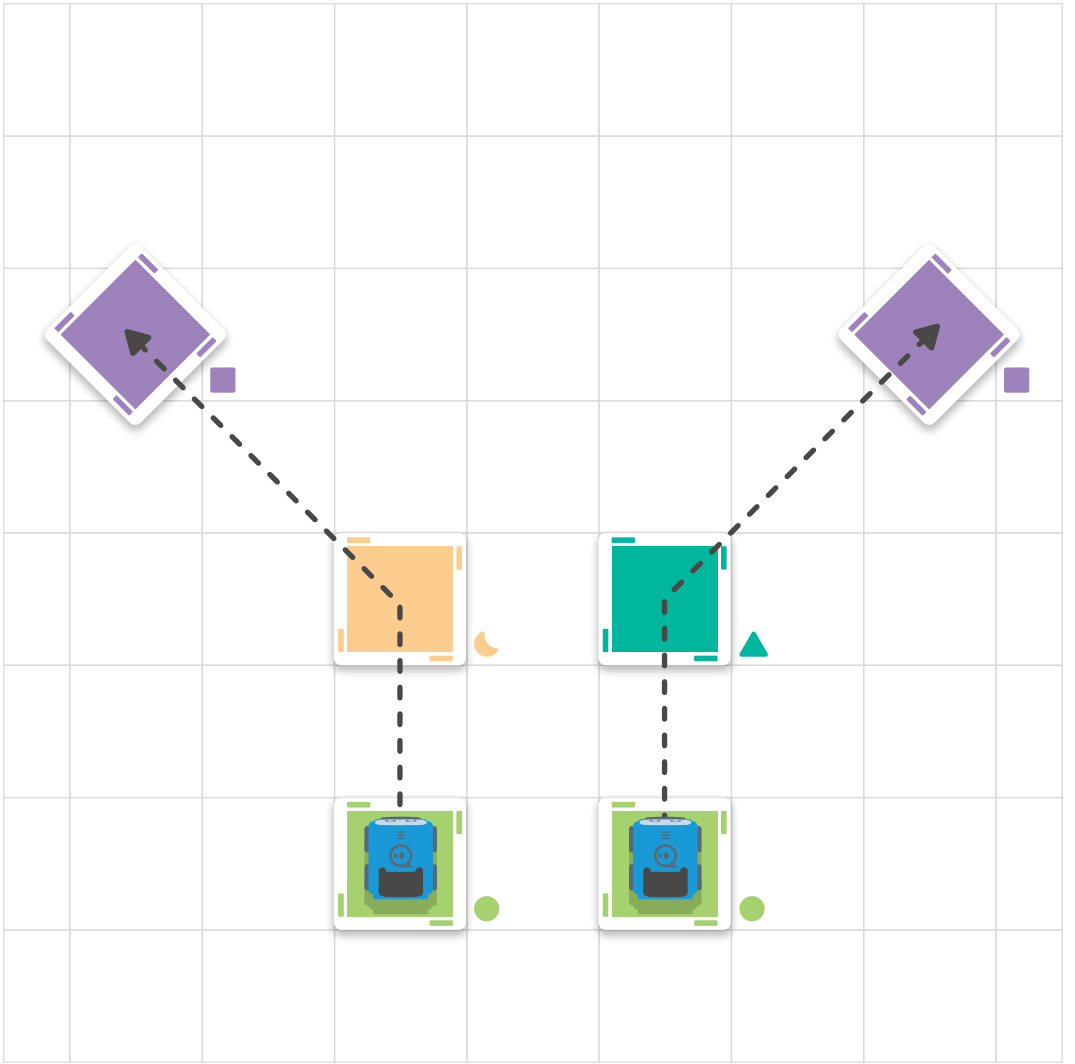

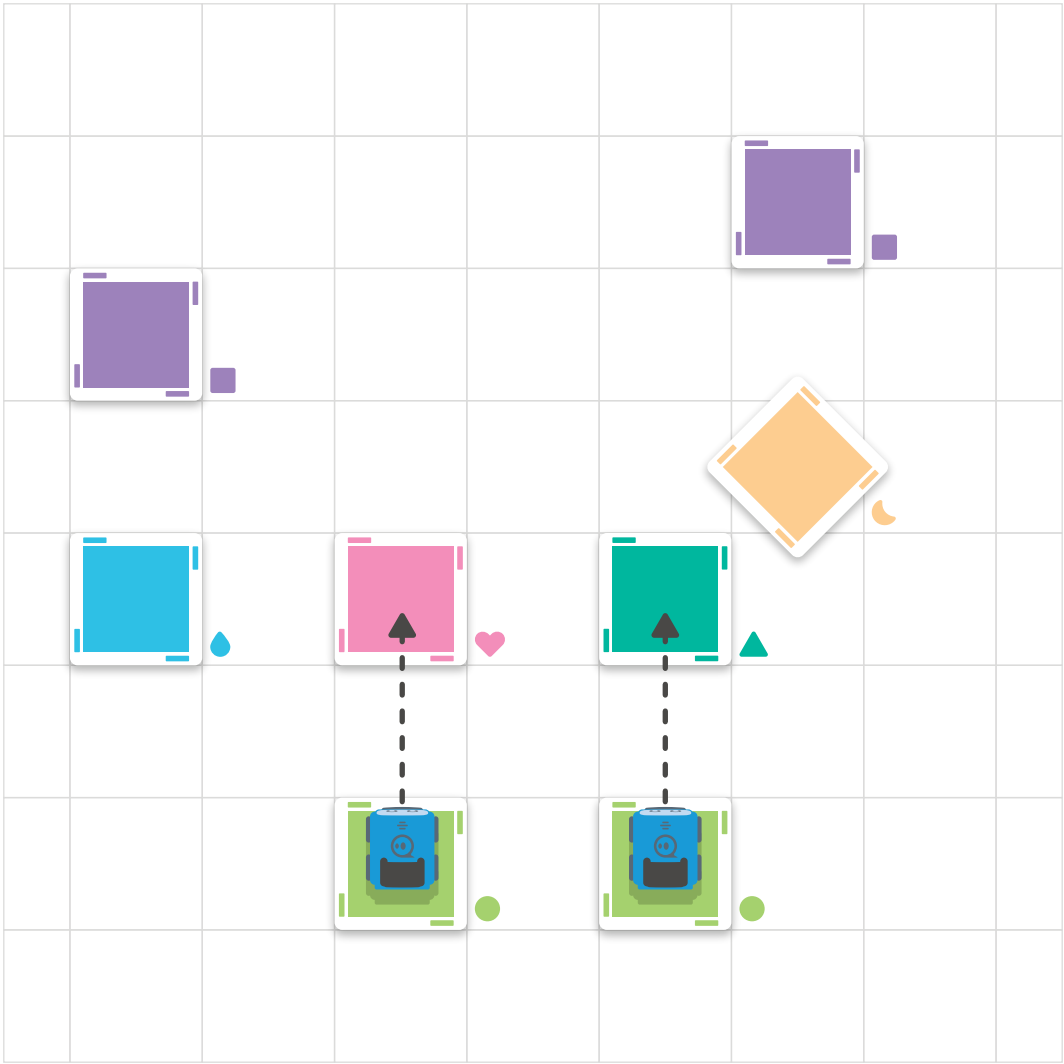

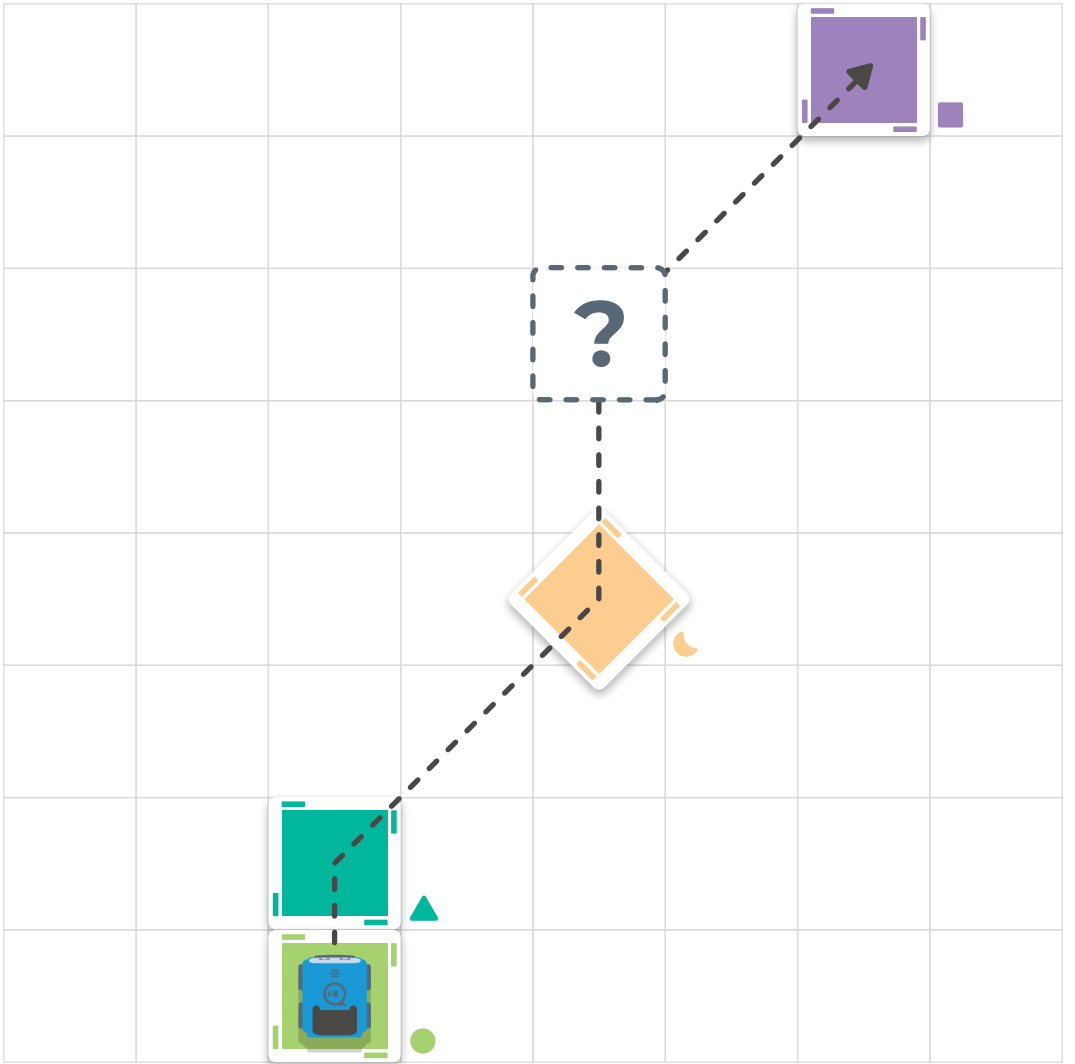

¿No tienes claro dónde colocar tu tarjeta de color? Utiliza el transportador que hay en la parte trasera de este libro.

indi se apagará si permanece inactivo durante más de 5 minutos.
