

West Indian Cherry Peel-Off Mask

REF: F05

West Indian Cherry Mask is made from a marine complex derived from Laminaria seaweed. A pure and natural mask containing no preservatives, it's formulated to conform to facial contours and to peel off in one piece after 20 minutes, plumping the skin and speeding penetration of Barbados cherry (acerola) which is highly concentrated in natural ascorbic acid. This mask also contains crystalline ascorbic acid.

Alginate has hypoallergenic qualities which makes it a suitable treatment for all skin types, even the most sensitive. It's an ideal base for a professional facial treatment due to its combination of natural freshening and skin-tightening sensations. The environment created by this second skin also diffuses the active ingredients in any creams or serums applied prior

Directions: 30 g of powder with 90mL of water.

Important: use water at 20°C.

1. Pour all the water at once on the powder, stir quickly and vigorously for one minute to get a homogeneous paste.
2. Apply the paste immediately to the face. The mask sets in under 6 minutes following the application.
3. Leave the mask to perform its function at least 15 minutes.
4. Remove the mask by peeling it off in one whole piece.

Ingredients

Diatomaceous earth
Algin
Calcium sulfate hydrate
Tetrasodium pyrophosphate
Cyamopsis tetragonoloba (guar) gum
Sodium ascorbate
Maltodextrin
Magnesium oxide
Malpighia punicifolia (Acerola) fruit extract

Packaging

30 g Individual Treatment Sachets
15kg Bags

Storage

Shelf life: 29 months
Avoid: heat, sunlight, humidity
