

Keeping hands & surfaces clean this winter season

Everyone needs good hand hygiene! Handwashing with soap is an effective and affordable way to prevent diseases and keeping safe from infection. Wash your hands with soap and water for at least 20 seconds and dry your hands with paper towels.

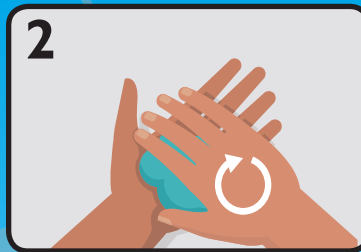

Where washing facilities are not available use a hand sanitiser.

Keep surfaces and touch points clean by using a sanitiser that kills bacteria.

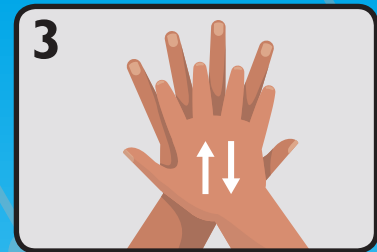

Follow these simple hand hygiene steps:

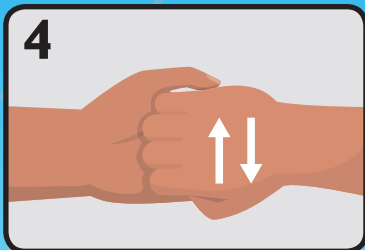

Wet hands and apply soap

Rub hands palm to palm

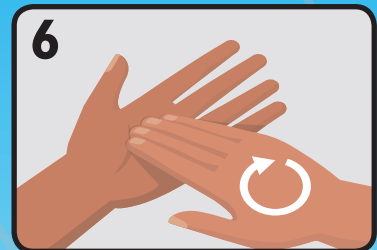

Fingers interlaced, rub palm to palm and then right palm to back of left hand and vice versa

Cusp back of fingers into opposing palm and rub side to side

Clasp right hand around left thumb and rub thumb in rotational manner and vice versa

Rub in a rotational manner backwards & forwards by placing fingertips of right hand in left palm and vice versa

Rinse hands under running water

Dry hands thoroughly

Sanitise your hands by rubbing them together, covering all surfaces, including between your fingers and around fingertips and nails
