

HELPING YOU TO RECYCLE...

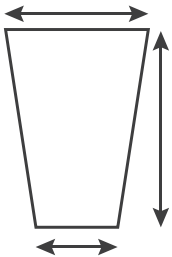

REDUCE / REUSE / RECYCLE

Refuse Sacks made from 100% recycled raw material can be fully recycled where facilities available

Choosing The Correct Sack

Choosing the correct size and considering your weight requirements for your waste is also important to reduce any unnecessary wastage.

- Refuse Sack dimensions - closed width x open width x length, eg 18x29x38.
- The open width facilitates the top of the bin - to calculate open-width measure the rim of the bin, and divide measurements by 2.
- To calculate the length of the sack required measure the height of the bin and add approximately 6-7" to ensure the bag grips the side of the bin, and allows the sack to be tied effectively when removed from the bin.

Consider The Weight Requirements

CHSA Sack Standards	CHSA Rating
Light Duty	5 to 8KGS
Medium Duty	10 to 12KGS
Heavy Duty	15 to 18KGS
Extra Heavy Duty	20KGS

Product Code	Supplier Description	Colour	Max Weight Capacity	Closed x Open x Length "	Waste Examples
17923	Standard Refuse Sacks Medium Duty	Black	10kgs	18x29x37	Light Food Waste Cardboard & Paper Plastic Bottles Food Packaging
