Stapler / Staples / Hole Punch

MAX's Philosophy

MAX has been continuously expanding its office products business in Japan for more than 70 years. Our staplers and staples actually hold the No.1 share in their product category in Japan. In addition, MAX is recognized by customers across Asia and the Middle East as the top quality manufacturer.

Why has MAX achieved recognition as a top manufacturer by Japanese and Asian people? We are strongly committed to quality, and continually receive the support of our customers as a result. Today "MAX = high quality" has become an established brand throughout the region.

We have researched and created new functions such as "flat-clinch" and "light effort". Functions which our customers feel are convenient, whenever they use our products. Specifically, our research keeps us close to our customer's needs by having members of our product planning division and R&D staff actually visit customers using our staplers, seriously consider ways to improve their satisfaction, and grasp new functions which can be used for stapler innovation.

However, until now we have not actively promoted our brand in areas besides Japan and Asia. Perhaps our enthusiastic artisan spirit has kept our focus on doing our utmost for customers close to Japan, and kept Westerners from knowing and understanding our brand. MAX JAPAN will be different from now on. We will deliver superior Max products to the entire world, and aim to put a smile on the face of all the people who use our products.

Pioneering stapler design and manufacture over 70 years

MAX was established in 1942.

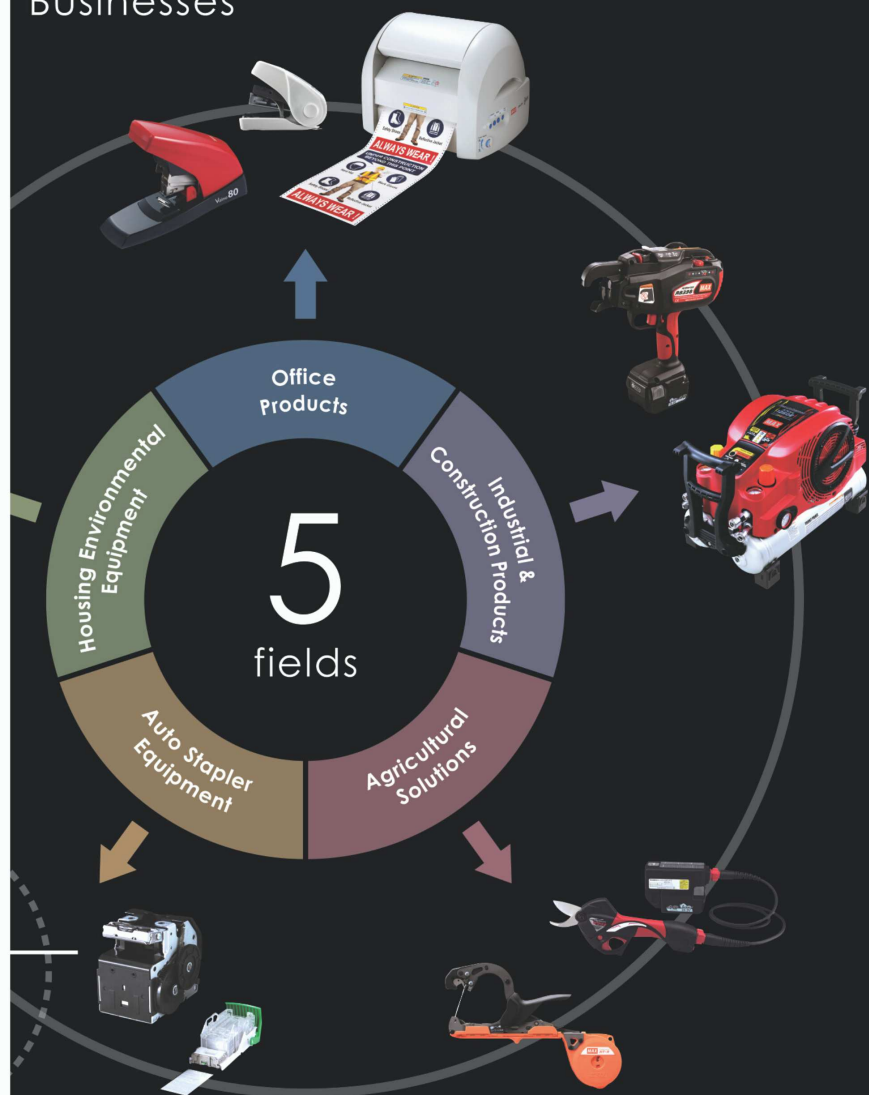

Our first stapler "Yamako Smart" was launched in 1946, and continues to be a long selling item with its original beautiful chromium plating design. We also developed Japan's first handy stapler in 1952, and proceeded to pioneer the mechanisms for the world's first "Flat Clinch" staplers.

Due to our philosophy of only producing high quality products, we continually strive to achieve ultimate functionality and quality.

PREMIER SERIES

No.11 STAPLER

Vaimo 80

HD-11UFL

Easily staples up to 80 sheets by unique fine staples
*64gsm paper

Heavy duty and ultra-light effort stapler

MAX's unique stapling mechanism cuts effort by more than 70%
(Compared with our other standard products)

Light Effort

Light effort by MAX advanced mechanism.

One Push Loading

Magazine slides out with the press of a button.

Flat Clinch

Papers stack neatly and evenly.

Beautiful fine staple

Beautiful fine staple gives a smart impression on the document. Without changing staples, the No.11-80 (10mm) staple works on documents from 2 pages all the way up to 80 pages (64gsm paper).

Japanese Quality and Technology for **Vaimo** Series

HD-11FL

HD-11UFL

Supporting tip shape driver (Staple driving plate)

Prevents deformation by pushing just above the staple legs with micro-supports on right and left sides. The driving plate precisely guards both shoulders of the staple, applying concentrated force from above prevents deformation of the slender staple.

Staple holder & staple guide

The plate spring supports the bottom of the staple arch and prevents deformation. Prevents deformation and staple ejections by holding the staple which is pushed by the driving plate.

Double-stage clincher

By adopting two angles on the receiving surface, staples are caught with certainty. The mechanism clinches the staple, even when the entry angle changes due to the thickness of the document.

Special fine staple for **Vaimo** series

No.11 staples enable light stapling feeling and a smart impression on the document because the diameter of No.11 staples is finer than 24/6 & 26/6 .
