INTRODUCTION

The AGM model designation is shared by two designs that operate in the same manner and have the same basic dimensions; however most service parts for the two designs are not interchangeable. The first design was manufactured prior to March of 2010; the second design began manufacture in March of 2010.

Models produced before March 2010 will have the gas inlet located 8” from the left corner and models produced March 2010 to present will have a gas inlet located 3.5” from the right corner. AGM models manufactured prior to March 2010 will have a removable bullnose (see item 13 on page 3) and AGM models manufactured March 2010 to present will have a bullnose that is welded to the griddle plate assembly and cannot be removed. The image on the front cover represents models manufactured beginning in March 2010 to present.
