

UltraAV DisplayPort 1.2 to 2 DisplayPort Multi-Display MST Hub

Mirror or Extend your Desktop Over 2 Displays

The Accell UltraAV DisplayPort or Mini DisplayPort 1.2 MST Multi-Display Hub allows you to enjoy up to 2 DisplayPort monitors from a single DisplayPort or Mini DisplayPort output. Available in DisplayPort and Mini DisplayPort versions, the MST hubs utilize the new Multi-Stream Transport (MST) protocol, supporting up to 2 displays independently at 3840x2160 @30Hz or 2560x1600 @60Hz each with DP 1.2 or HD 1080p with DP 1.1 single-stream transport (SST).

The Accell UltraAV MST Multi-Display Hubs support non DisplayPort outputs, including VGA, DVI or HDMI. The MST Multi-Display Adapter is DP++ and can actively convert the DisplayPort signal to other display interface signals using active or passive adapters. You can chose to view a single image across two displays, perfect for gaming, graphics design or spreadsheet analysis. Easily dedicate each display to a separate application, providing the efficiency and productivity of multi-tasking.
