

COMBAT YOUR SKIN CONCERNS NATURALLY

Your Banish Starter Kit comes with the Banisher 2.0, Vitamin C Creme, Banish Oil, Vitamin C Beauty Elixir, Pumpkin Enzyme Masque and Activated Charcoal Clay Masque, and carrying bag. Freshly made the day you ordered!

HOW IT WORKS:

Activated charcoal masque unclogs pores and blackheads and absorb excess oils and dirt.

The pumpkin enzyme masque contains AHAs and is used to exfoliate skin and prevent break-outs

The vitamin c creme helps reduce hyperpigmentation, protects against damage from free radicals, and helps skin restore collagen for a fresh glow.

The banisher makes micro wounds in skin causing skin to heal and repair itself and build new collagen fibers. When the Banish Oil vitamin c serum is applied after a Banisher sessions, it is absorbed deeper into skin because of the micro channels the banisher just made. The serum provides vitamins to speed up the collagen and scar fading process & doesn't contain harmful ingredients. Use the banisher once a week to fade scars, wrinkles, dark spots, stretch marks and improve overall skin texture.

HOW TO USE:

Clean your face with your favorite cleanser

1. (optional, you can skip this if your skin is sensitive) Apply the activated charcoal clay masque to deep clean pores and draw out blackheads, dirt and excess oils. Mix a small amount with equal parts water to form a paste and apply thin layer onto face. Let dry for 10 minutes and rinse off. Skin can be red after clay mask which is normal and redness will go away within an hour.

2 Add rubbing alcohol to the Banisher 2.0 cap and twist cap back on so needles are saturated with the rubbing alcohol to sterilize it.

Unscrew cap and let alcohol evaporate from the Banisher 2.0 for a minute or two. Press it 4-5 times on the areas you want to treat such as areas with scars, or hyperpigmentation, texture, or fine lines. Make sure to avoid pressing on active pimples. Skin may look a little red after, which is normal.

4. Apply Banish Oil

Get about 2-4 drops of the Banish Oil and pat onto skin. Some stinging may occur since vitamin c contains citric acid. Redness usually goes away within a couple hours. Apply serum once a day.

5. Spray vitamin c beauty elixir to tone skin and leave the serum and elixir on for the rest of the day or night.

The next morning, you can continue with your regular skincare and makeup routine like washing face etc. Apply sunscreen the next few days when using the Banisher or pumpkin enzyme masque since skin may be more sensitive to the sun's rays.

6. Use pumpkin enzyme masque to exfoliate 1-2 days after using the Banisher. Apply a thin layer and leave on for 10 minutes and rinse off thoroughly.

If you use strong exfoliating or medicated creams it is recommended to wait at least 1 to 2 days after using the Banisher to use them.
