ALL NATURAL DOG TREATS COLO. USA

6"-12" BEEF TAILS

Ingredients: 100% beef tail.

Description: This is a 6" length of a whole beef tail, which includes the vertebrae and all surrounding tissue. The small rounded vertebrae will not splinter into sharp pieces due to its shape (compared to something like a long rib bone).

Recommended for: Small to medium dogs under 30 lbs, the 12" beef tail is recommended for large dogs over 30 lbs.

Chew Time: The skin and muscle tissue on this tail is chewy and the inner vertebrae are hard and crunchy. It can be a long lasting chew for smaller dogs, and moderate for medium to large dogs.

Pro Tip: As a natural source of calcium, this chew is especially recommended for dogs on a raw or homemade diet (since meat is high in phosphorus but low in calcium). (This chew is meant for supplemental feeding and not intended to replace a part of a dog's regular diet).

Country of Origin: Turkey

Ways to Purchase: In bulk, in a 6" or 12" length.
