# HOW TO PICK THE PERFECT CHEW FOR YOUR DOG!

**Why should I give my dog a chew?** Dogs NEED to chew! It is a natural behavior that makes them feel good. Giving your dog a variety of treats and toys to chew on will improve the quality of their life - providing many outlets of enrichment will make your dog happier and healthier!

**LONG  
LASTING!**

**Bones and antlers** are very dense, so they're the most durable and long lasting chews available. Because these chews are so hard, don't offer them to dogs with underlying dental problems.

**Bully sticks** are a hardy chew that's appropriate for dogs of all life stages and sizes. These popular treats are often known to be smelly, but The Natural Dog Company makes high quality, all natural **odor free** bully sticks!

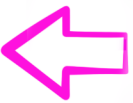

**Beef tendons** are a tough chew that's low in fat, high protein, little to no odor, and easily digestible. This palatable treat is a great recommendation for picky dogs!

**Beef trachea** are a natural source of glucosamine, which may aid in joint health. Because this chew is wide and tubular, it's a good recommendation for dogs who are "gulpers" and try to swallow other treats whole!

**Tremenda tough sticks** are made of 100% beef bladder. This inexpensive chew is packed with a unique flavor that your dog is guaranteed to love! The texture isn't as hard as a bully stick, so it's an excellent option for senior dogs and young puppies.

**A QUICK  
TREAT!**

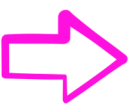

**Gullet sticks** are a softer, tasty chew that all dogs, regardless of age or size, will enjoy!
