ALL NATURAL DOG TREATS COLO. USA

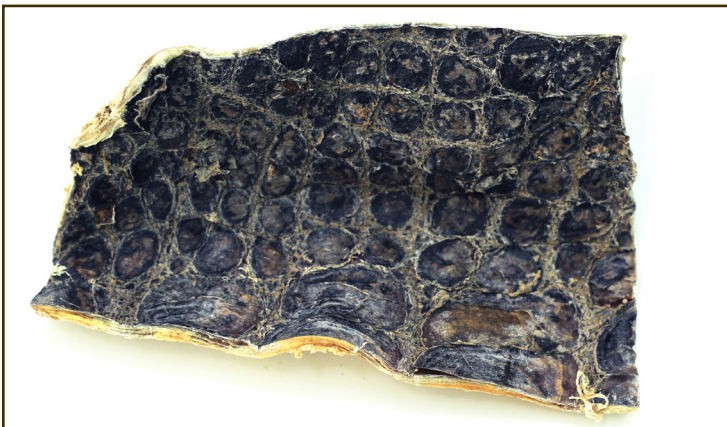

GATOR CHEWS

Ingredients: Alligator skin.

Description: Natural Alligator Skins from Louisiana, no two pieces are alike.

After these chews are cooked, they will vary in size, thickness, and shape. Due to the variations in shapes, this treat is not available with elastic barcodes. Some treats may lay flat or curl up into a roll. Occasionally, you may see a small amount of salt residue, which used to dry the skin. The majority of the salt gets washed off prior to cooking. No other preservatives or additives are used.

Our Gator Chews are exclusive to The Natural Dog Company! You won't find these treats at big box retailers or on Amazon or Chewy.

Recommended for: All life stages and sizes of dogs. Alligator is a novel protein, so it would be suitable for many dogs suffering from common food allergies.

Chew Grade: Medium. This chew has a firm texture, and will be a durable, long-lasting chew for smaller and medium sized breeds. Larger breeds or aggressive chewers will be able to consume this chew in under 30 minutes.

Treat Trivia: These gator chews are from the from the alligator meat market. Alligator skins used to be used for luxury goods (such as bags, belts, shoes, etc) but there's no market for it anymore - instead of allowing the skins to go to waste, we've decided to turn it into a tasty dog chew!

Country of Origin: USA

Ways to Purchase: In bulk, 10 pieces per case.
