ALL NATURAL DOG TREATS COLO. USA

LAMB TAIL

Ingredients: 100% lamb tail.

Description: This is a whole lamb tail of varying lengths (on average, 4"-6" long), which includes the vertebrae and all surrounding tissue. The small rounded vertebrae will not splinter into sharp pieces due to its shape (compared to something like a long rib bone, which can easily splinter).

Recommended for: Small to medium sized breeds of all life stages.

Chew Time: The skin and muscle tissue on this tail is chewy and the inner vertebrae are hard and crunchy. It can be a long lasting chew for smaller dogs, and quick to moderate chew for medium sized dogs.

Pro Tip: As a natural source of calcium, this chew is especially recommended for dogs on a raw or homemade diet (since meat is high in phosphorus but low in calcium). (This chew is meant for supplemental feeding and not intended to replace a part of a dog's regular diet).

Country of Origin: Turkey

Other Ways to Purchase: Available in bulk as a 25 pack bag, or a retail-ready 10 pack bag.

Guaranteed Analysis:

Crude Protein: 20.0% min

Crude Fat: 24.5% min

Crude Fiber: 3.1% max

Moisture: 7.2% max
