ALL NATURAL DOG TREATS COLO. USA

LAMB TRACHEA

Ingredients: 100% lamb trachea.

Description: There is some variation in length with these crunchy lamb trachea, but on average each piece is about 6-8" long. Your customer may ask about the waxy yellow substance that may be seen on the surface trachea: it's fat that is yellow because of the beta-carotene pigments found in grass that the lambs eat! (Grain fed animals have white fat deposits, rather than yellow).

Recommended for: Dogs under 60 lbs.

Chew Time: A moderate chew for the majority of dogs, with a crunchy texture.

Pro Tips: Many dog owners are convinced that their dog is allergic to beef, so we recommend diversifying your chew section by offering treats made from other protein sources, such as lamb! This chew has a higher fat content compared to chews like bully sticks and antlers, so the vast majority of dogs, even the incredibly picky ones, will find this chew highly desirable.

Country of Origin: Turkey

Ways to Purchase: Sold in bulk as a 25 pack, or as a 10 pack

Guaranteed Analysis:

Crude Protein 32% min

Crude fat 51% min

Crude fiber 4% max

Moisure 10% max
