ALL NATURAL DOG TREATS COLO. USA

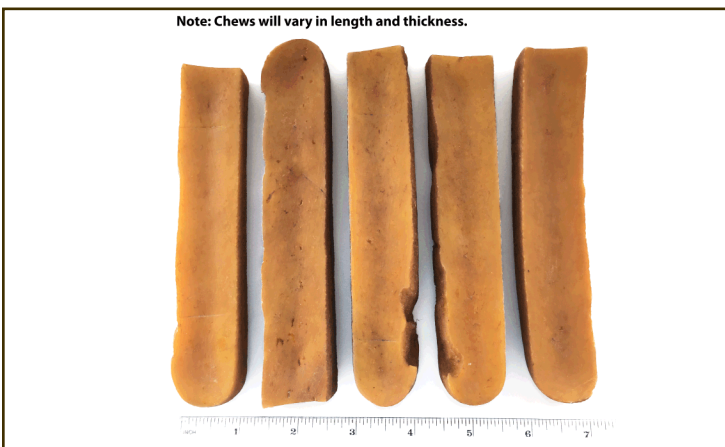

NEPALESE YAK CHEESE

Ingredients: Yak milk, salt, lime juice

Description: A traditional hard smoked cheese sourced from free-ranging yak. Unlike other similar chews on the market, our yak cheese are made with only yak milk - no cow milk is added. Nepalese yak cheese is very hard and will soften over time as a dog continues chewing on it.

Recommended for: All life stages of dogs. Small (dogs under 10 lbs), medium (dogs 11-20 lbs), large (dogs 21-40 lbs), X-Large (dogs 41-60 lbs), XX-Large (dogs 61+ lbs)

Chew Time: A long lasting chew for most dogs.

Sales Tips: The cooking process removes the lactose, which makes this chew more easily digestible for dogs when compared to cheeses manufactured for human consumption. This is one of the more ethically made treats out there - yak are still traditionally raised in Nepal, and are allowed to free range on the mountains. Smaller pieces of yak cheese (especially the remaining nub once the dog consumes most of the chew) can be popped in the microwave for 60-90 seconds and will transform into a crunchy puff treat.

Guaranteed Analysis:

Crude protein 52.8% min
Crude fat 0.9% min
Crude fiber 0.0% max
Moisture 10.2% max
