

## XM Radio 6 Volt Hardwired Power Adapter

### Installation Guide

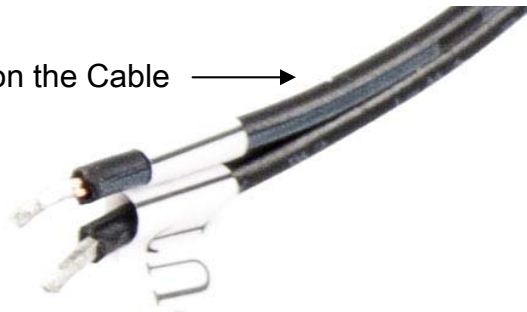

The LPAD-6V is designed to work with any XM Radio 6 volt portable receiver. The LPAD-6V is a Satellite Radio Superstore exclusive product allowing you to hardwire the power of your 6V satellite radio receiver into your vehicles power source. This adapter works with the Delphi SKYFI, Delphi SKYFi 2, Delphi Roady, Delphi Roady 2 and Jensen XR9 & XC9.

Below are basic installation instructions.

### Connect the Adapter to Power & Ground in Your Vehicle

Positive Wire Has Long Gray Dash on the Cable →

The positive wire (with long gray dashes) gets wired to positive power in the vehicle and the negative wire gets wired to common or ground in the vehicle. If you experience "engine noise" when you press the gas pedal you may need to move to a better ground source.
